CITY GOVERNMENT, 1893.

EXECUTIVE DEPARTMENTS.

MAYOR.

HENRY O. FAIRBANKS.

School Committee.

EMERY L. CRANE, *Chairman.*
SUPERINTENDENT LULL, *Secretary.*

	Term Expires
At Large, Dr. JOHN A. GORDON,	1895
At Large, Dr. JOSEPH M. SHEAHAN,	1896
At Large, HARRISON A. KEITH,	1894
Ward 1. CHARLES H. PORTER,	1895
Ward 2. JAMES F. HARLOW,	1896
Ward 3. EMERY L. CRANE,	1896
Ward 4. AMBROSE F. ROCHE,	1894
Ward 5. WENDELL G. CORTHELL,	1895
Ward 6. ELIJAH G. HALL,	1894

Regular meetings the last Tuesday of each month at 8 P. M.

LEGISLATIVE DEPARTMENT.

City Council.

E. W. HENRY BASS, President.
CITY CLERK SPEAR, Clerk.

Councilmen-at-Large.

FRANK E. BADGER, CHARLES T. BAKER, JOHN E. DRAKE,
JOHN O. HOLDEN, JONAS SHACKLEY.

Councilmen from Wards.

Ward One.

CHARLES F. ADAMS, 2d,
LUTHER S. ANDERSON,
E. W. HENRY BASS.

Ward Two.

HERBERT M. FEDERHEN, JR.,
CHARLES H. JOHNSON,
ROBERT J. WILLIAMS,

Ward Three.

CHARLES H. GRINDELL,
EDWARD J. LENNON,
ALEXANDER C. SMITH,

Ward Four.

PETER J. DONAHOE,
JOHN O'CONNELL,
JOHN H. ROONEY.

Ward Five.

SYLVESTER BROWN,
EDWARD L. ROBBINS,
CHARLES R. SHERMAN.

Ward Six.

HORATIO N. HOLBROOK,
STEPHEN O. MOXON,
WILLIAM H. OWEN.

Regular meeting on the first and third Monday of each month at 7.35 P. M.

Standing Committees of the City Council.

Finance, Accounts, State Aid, Claims, Salaries, Contracts, Bonds,—
MOXON, ADAMS, SMITH, SHERMAN, BAKER.

*Streets, Ways, Sidewalks, Bridges and Lights,—*HOLDEN, ANDERSON, JOHNSON, SMITH, O'CONNELL, ROBBINS, MOXON.

INAUGURAL ADDRESS

1893.

HON. H. O. FAIRBANKS, Mayor.

MAYOR'S ADDRESS, 1893.

GENTLEMEN OF THE COUNCIL :

The opening of a new year, by virtue of ancient and modern custom, is a season for the extension of cordial good will and friendly greeting, and so today, standing as we do on the threshold of a new municipal year, a pleasant duty devolves upon me of bidding you a cordial welcome as the official representative of the citizens. They for the present year have entrusted to our keeping their interests, and ever mindful of their confidence in us, it is our sacred duty as we accept the many responsibilities, to be actuated with but the one desire—of promoting the welfare and happiness of the people. It will be our duty to give careful and conscientious consideration to the questions brought to us for our judgment, endeavoring always to remember that we today take the oath of office to represent the citizens of Quincy, and not any particular political party or any one section of the city. The welfare of the *whole* city is placed in our keeping, and to consider wisely, act impartially and decide as our judgment dictates is what should be our aim.

The charter under which we are governed differs widely from those of other cities, and as you become familiar with its provisions, you will readily see that the duties of each department are clearly defined.

I believe that the records of the Council will show that a great portion of its time has been taken in considering questions that are not in the province of the Council to debate, and have been finally referred to the executive department, as they should have been at first. I refer particularly to the petitions for repairs on the streets, which, by the charter, should be referred to the Commissioner of Public Works, except when the petitions call for specific repairs, such as the change of grade, which can only be done by order of the Council. I believe that if you will study the question, you will come to the conclusion that you can have fewer sessions of the board, and be relieved of much committee work.

I have deemed it my duty to speak of this, not simply because of my own experience, but because throughout the whole country thinking men are discussing the best form of municipal government, and I am often in receipt of inquiries as regards the workings of both departments. I believe I but voice public sentiment in saying that the Council of '93 can profit by the experiences of the other Councils.

We are well aware that in the last few years of our town form of government many much needed improvements were delayed and referred to the City Government, resulting in an extraordinary demand the past four years for new bridges, new public buildings and improved highways. These demands have been met, and apparently a large debt incurred, as compared with the town debt, but most of the improvements were absolutely necessary, and are of the nature of permanent improvements, and the city has the property in sight.

Other needed improvements may be called for, and it will be our duty to consider them carefully, bearing, however, in mind that we must guard against extravagance, which would create a heavy tax rate, and the other extreme, which would prevent our city being a desirable one to reside in. Care should be

taken in ordering specific appropriations, that the loans are so proportioned that the burden of paying for the same will fall equally upon those who are to enjoy the benefits.

FINANCES.

The prosperity of any city depends in a great measure upon the management of its finances, and I would therefore call your attention to the finances of the city.

The expenditures of public moneys for the current expenses of our city are controlled by the provisions of Chapter 312 of the Acts and Resolves of 1885. This chapter limits the appropriation for city purposes to a sum not exceeding \$12 on the thousand of the average valuation for the three preceding years. For other purposes, such as the State and county taxes and sums required by law to be raised on account of the city debt, the assessors are obliged to provide the means; so, while the law limits the amount for current expenses, the tax rate is determined on the valuation of the property upon which the entire amount to be raised is assessed.

NET VALUATION FOR THREE YEARS.

	Total Valuation.	Abatement.	Net Valuation.
1890	\$13,677,410	\$127,114	\$13,550,296
1891	14,427,030	166,691	14,260,339
1892	15,566,920	157,471	15,409,449
			<hr/> \$43,220,084

Average valuation for three years, \$14,406,695; and at \$12 per thousand gives \$172,880.34, which is the legal limit for current expenses, outside of the requirements previously spoken of.

I am pleased to state that during the past year the appropriations for the executive department have not been exceeded.

It is very desirable to have a low tax rate, but in a rapidly growing city like Quincy, with its large number of school children, demanding new school buildings every year, and the citizens calling for better streets, it is simply folly to expect such improvements without using the credit of the city, for the \$12 on the thousand will not supply the means to us, any more than it does to the other cities.

CITY DEBT, 1893.

	Totals.	Falling due this year
Willard special,	\$2,000	\$1,000 Jan. 1
Hancock street, first loan, . . .	32,000	4,000 May
Burial places,	4,000	2,000 May 1
Common street, first loan, . . .	9,600	1,200 June 1
Wollaston school,	7,000	1,000 July 1
Neponset bridge,	14,000	2,000 July 1
West street,	1,000	1,000 July 1
Washington street,	10,000	2,000 July 1
Paved gutters and street crossings,	5,000	3,000 May
Common street, second loan, . . .	1,200	1,200 May
Hancock street, second loan, . . .	10,700	700 June.
Willard school, third loan, . . .	6,000	2,000 August
Willard land,	11,060	1,580
Willard school, first loan, . . .	53,900	7,700 Nov.

				\$287,442	\$61,862	

WATER LOANS.

Extension of mains,	.	.	.	\$25,000	\$1,000	Dec. 1
Retaining counsel and experts,	.	.	.	10,000	10,000	

A total of \$287,442.36, of which amount \$61,862.36 is due this year. \$278,892.36 of the debt is of the nature of permanent improvements.

Borrowing capacity of the city is as follows: Average valuation for three years, \$14,406,695; two and one-half per cent. of which (being the limit by law of municipal indebtedness) is \$360,167, leaving a margin of \$72,724.64 on January 1, 1893.

The Council authorized a loan of \$10,000 for one year to defray the expenses incidental to determining the value of the Water Works, and the same to be transferred to the water loan when made, and as the award will not probably be announced until late in the year, I would recommend that the treasurer be given authority to renew this note, falling due in May, for one year.

As the current expenses of the city commence January 1st, and the citizens do not begin to pay for the benefits they receive until late in the year, the city must necessarily borrow on tem-

porary loans to meet the general expenses, pledging for the same, taxes of the year.

It has been held that these loans were not of the same nature as other municipal indebtedness, and were exempt from the two and one-half per cent. limit, because the taxes for the year were a sinking fund to provide for their payment; and as these loans can be authorized by a *majority* vote of the Council, while it takes two-thirds of all the members to authorize a loan for any other debt, it is claimed that the Legislature did not consider temporary loans a debt; but a strict interpretation of the statute has been rendered by the Attorney General that temporary loans *are* a part of the debt, and that view must be taken until the Legislature considers the question. The treasurer had to borrow the past year \$162,000 for running expenses until the taxes commenced to come in. The city has \$64,000 due in uncollected taxes, and one temporary loan of \$40,000 to pay. As the running expenses of the city commence immediately, the treasurer must borrow on temporary loans for 1893. The city had to expend in 1892, \$3,500 for interest on temporary loans.

WATER SUPPLY.

In 1883 a charter was given to a private corporation under which they had the right to furnish to the citizens a supply of water for domestic and fire purposes, and during the past few years the question of city ownership of the plant has been discussed. After considering this important question in all its bearings, realizing also that there was in our midst a strong sentiment in favor of again trying for the establishment of new works, I deemed it for the best interests of our city to recommend that the question of the purchase of the property and franchise of the private corporation be submitted to the citizens, and on April 30, 1892, by a vote of 1138 to 474, the action of

the Council was ratified and confirmed, and the works purchased under the provisions of Chapter 162 of the Acts and Resolves of 1883. Upon me devolved the selection of the counsel to prepare the case on behalf of the city, and I deemed it best to retain R. M. Morse, Esq., James E. Cotter, Esq., and J. W. McAnarney, Esq., to act in that capacity. The following experts were also engaged to furnish the proper information: Messrs. Desmond Fitzgerald, Henry Crafts, J. H. Shedd, A. H. Howland, Percy M. Blake, and others whose names I withhold for the present.

Acting upon the advice of my counsel, an official notice was served upon the directors of the Quincy Water Company, informing them of the purchase by the citizens and requesting a transfer of the property.

The transfer was made June 1, 1892, and the works placed in the charge of the Commissioner of Public Works.

A demand was also made upon the company for the price for which they would convey the works to the city, and failing to agree upon the same, a petition was forwarded to the supreme court asking for the appointment of a commission to determine the value of the works. The commissioners were appointed Nov. 19, 1892, namely:—Hon. John Lowell, Hon. Edmund H. Bennett and Walter Clifford, Esq., who visited Quincy Dec. 3 to examine the property, and assigned as the first hearing February 20, 1893.

Realizing that a settlement as to the price to be paid would not be reached for at least a year, and believing that the urgent call for a supply of water should be heeded, I requested that authority be given to petition the Legislature for an act permitting the appointment of a board of water commissioners, and for the means to extend the mains, purify the supply and to provide for the incidental expenses that must be incurred in determining the value of the works, for there was no authority in our charter or in the acts of 1883 to permit the city to make

any extensions. The required permission was granted June 13, 1892.

June 15, 1892, I appointed Messrs. H. T. Whitman, John T. Cavanagh and James H. Stetson as the board of water commissioners for the terms respectively of three, two and one years, and they assumed the management of the works June 22. July 13 they requested an appropriation of \$25,000 for the purpose of making new extensions, which was granted by the Council Oct. 10, and their report will show the details of their work. The board realizes the need of future extensions to supply the demand for water in a rapidly growing city, and believe that the same should be done when a revenue is gained to the city over the cost of construction. The city has in its possession valuable information as regards all questions pertaining to our water supply, and at a proper time will be communicated to the Council.

SEWERAGE ACT.

I have already stated to the Council that in my judgment the urgent need of a system of sewerage for certain sections of our city called for a careful consideration of this great problem. During the past year a study of the water question brought out the facts that in nearly all cities the expenses of a system of water supply were borne by those who received the benefits, the receipts from consumers making the works self supporting and no extra burdens laid upon the city. The first problem in any city is to furnish the citizens with a bountiful supply of good water, and the next problem is to adopt a plan to get rid of the impure and waste water for the protection of the public health, and in my opinion the same business methods should be adopted in both cases. In supplying water an annual rate is charged to the consumer, and why not carry out the same feature and make an annual charge to those who are to enjoy the benefits of a

system of sewerage. Is it not safe to argue that the citizens who are consumers of the city water would also avail themselves of the privilege of disposing of the same by means of the proposed system of sewerage and pay an annual rate; and would not others, who still enjoy the benefits of a supply of water from other sources, prefer to make use of the system than to depend upon the unhealthy and unsightly cesspools, and so would not the rentals be larger in this case than the other?

If a system of water works can be made self supporting, by the same business methods a system of sewerage should be, and the person receiving the improvements paying for the same; and those not benefited should not be burdened by a heavy assessment. The assessment of a portion of the cost as proposed in the legislative act must necessarily be unwise and unjust in many cases, and a hardship in others, making the burden fall upon the present. I hope that the Council will consider the proposition of the city loaning its credit to construct the system and charging an annual rate to those who are benefited by it, as well as other questions in regard to the proposed system.

GRADE CROSSINGS.

I recommended in 1892 that the Council should consider the question of abolishing the grade crossings in our city, especially the one on Water street, but no discussion was had upon the subject, and it was referred to the Commissioner of Public Works. This is a specific matter, and should be so considered by the legislative body.

I fully realize that it will be a difficult and an expensive problem to solve, yet, as we are aware that it is a most dangerous crossing at the present time, and must become still more so in the future, is it not our sacred duty to consider it? The Old Colony Railroad Company has one plan to do away with this crossing at grade, but forces one to be made at School street,

which would be very objectionable. I have not any definite plan to recommend, but would suggest that during the year a public hearing be given in the Council chamber, and different suggestions and plans be received; after which to employ a competent engineer to study the problem and propose a remedy, acting, perhaps, afterwards in connection with the railroad company, and thus endeavor to arrive at some result.

WARD ROOMS.

The large number of voters in Wards One, Three and Four obliges the city to consider the expediency of dividing these wards into precincts. Under the law governing elections any ward containing eight hundred voters shall be divided; and as these wards are rapidly approaching the limit, I would recommend that the question of establishing precincts in the above wards be considered the present year. It is also the duty of the city to provide suitable places for the citizens to meet and cast their ballots, but as suitable halls are very difficult to obtain, I would also recommend that you consider the advisability of having temporary structures erected, in such precincts as your committee may deem best, to accommodate the citizens.

CIVIL SERVICE.

Believing in the principles of civil service examinations for vacancies that may occur in any department of the public service requiring experience and knowledge of the duties, I would recommend that authority be given to request the civil service commissioners to include the permanent or regular force of the fire department in the classified service.

WOODWARD FUND.

During the past year plans were prepared by James Murray, architect, for the new educational institution to be erected during

the present year. The plans meeting with the approval of the board of instruction, were accepted by the board of managers, and it is expected that work on the building will commence early in the spring. The fund now amounts to \$292,481.

JOHNSON FUND.

The city holds in trust \$2,000, the interest upon the same to be expended annually in charitable purposes.

The reports of the administrative officials, giving the details of the work performed during the past year, will be forwarded to the Council, but I shall refrain from making any special recommendations at the present time, preferring to study their reports and suggestions more carefully, and expressing to you my views in special communications. I would, however, remind you that previous recommendations to the Council that were not acted upon still meet with my approval, and I would call your attention to my communications on the following subjects :

“Adoption of a plan for surface drainage.”

“Widening of Coddington street.”

“Construction of permanent sidewalks.”

“Establishing a board of survey.”

“New hose houses in Wards Two and Four.”

“Needs of Houghs Neck.”

Gentlemen of the Council, today we begin anew the management of the business interests of the city of Quincy. Grateful for the confidence reposed in us by our fellow-citizens, let us bring to our work the sole incentive of being faithful to the best interests of Quincy, and endeavoring to the best of our abilities to fulfil the trust bestowed upon us by the citizens.

REPORT OF THE ASSESSORS.

To, His Honor the Mayor of the City of Quincy :

The Board of Assessors submit herewith their annual report.

We have assessed upon the polls and estates of the City for the year 1892, the following sums ;

City tax, (levy voted by City Council)	\$159,968 00	
“ (notes maturing during the year)	56,619 53	
City tax, (interest to be paid during the year)	13,500 00	
State tax, \$10,902 50 (less polls)	5,551 50	
County tax, \$13,328 24 (less polls)	7,977 24	
Overlayings	5,454 45	
Polls, (5,351)	10,702 00	
	<hr/>	\$259,772 72
Number of polls		5,351
Gain		191

Omitted and re-assessed taxes as follows :

On property	\$365 60	
On polls, (male 300)	600 00	
On polls, (female 15)	7 50	
	<hr/>	\$973 10
Rate of tax per \$1,000		\$16 00

Below will be found a table of aggregates :

Value of assessed personal property	
including resident bank stock	\$3,095,600 00
Resident bank stock	208,945 00
Total personal property valuation	\$3,304,545 00
Gain in “ “ “	35,640 00

Value of assessed real estate.

BRYANT N. ADAMS,

Collector.

DEPARTMENT OF PUBLIC WORKS.

HON. H. O. FAIRBANKS, MAYOR.

SIR:—I have the honor to present herewith my second and the fourth annual report of the Department of Public Works for the year ending December 31, 1892.

My department, embracing as it does so many and varied duties would be a lengthy one should I attempt to enter into details. I will therefore refer you to the Auditor's statement for the receipts and expenditures of each appropriation coming under my charge.

STREETS AND SIDEWALKS.

This is perhaps the most important duty of my department, certainly requiring the most time, thought and good judgment. The large and heavy teaming through our streets require many repairs upon them. A number of streets which are used largely by stone teams must be paved in the near future. I believe it economy to do so. The manner and material used in the adjoining towns in making and repairing roads will not do with us. We must have the best material that can be obtained and use more care in repairs and construction in order to keep our roads in even passable condition. I have used large quantities of crushed stone during the year and although it is much more expensive than gravel it is more economical in the end. It is now more than one year ago that I advocated to the City Council the needs of my department of a proper plant for crushing stone, and it gives me great pleasure to say that the Council has seen fit to pass the money for such a plant as I asked for, although too late to be of use during this year, the order being passed December 5th.

The plant can be erected during the winter months and made ready for next season's work. It is proposed to erect storage bins and with a new crusher, engine, boiler and self-dumping cars for conveying stone from ledge to crusher the stone can be handled much more economically than at present.

A special appropriation of \$3,000 was made for the improvement of Quincy avenue, and the street has been regraded, widened in places, culvert relaid, and some 1200 feet of fence built. The amount of money was quite small for a street of that length and the work was not as thorough as I could wish, but the improvement is well worth the outlay, and gives general satisfaction although I would advise more permanent work.

I regret exceedingly that widening and paving of Water Street is not yet completed. The money was appropriated by the Council of 1891 late in December and early in May of this year I advertised for edgestone and paving blocks, and commenced work upon it. The fences were moved back to the proper width as laid out by the Council. The two culverts across the street were taken up and enlarged, a retaining wall built and the larger part of the edgestone laid. The Council gave two hearings to the Quincy & Boston Street Railway Co., for new location and kind of rail to be used, and after a long and tedious delay, the location and kind of rail was decided upon.

The paving of the street could not be commenced until the Railroad company first laid their rails and not until November 1st did the work of paving commence upon that street. We immediately encountered stormy weather, and the work progressed slowly, as but an average of four days work per week could be done upon it owing to rain, snow and frost. December 10th it was agreed between the City and Railway company that better work could be done in the Spring and more economically, and all work was stopped for this year upon the street.

The street is about one half completed, and when done will be much appreciated and a lasting improvement.

Several small appropriations were made early in December: one of \$500 for Faxon Park street, a street which was partially built by the town government; \$500 for Robertson street sidewalk and \$450 for removing a ledge on South street. Work has

been commenced upon these but not completed. With favorable weather will complete during the winter months.

The work done during the year with the exception of the foregoing has been of a general character. The repairs have been made wherever most needed throughout the various parts of our city, and I feel that during the two years of my administration some improvement has been made on our highways.

I should be pleased to go into a more extended report showing the different kinds of gravel in the different sections of our city and that they are to be treated differently and their nature learned. I would also speak of the difficulty of properly draining many of our streets owing to the imperfect laying out and the low lands alongside being built upon.

Much could be written but space forbids. I stated in my last report that the sum given my department for miscellaneous repairs of streets was totally inadequate, and I again make the same statement. You ask and expect better streets and I unhesitatingly say that they can be had and maintained notwithstanding the very heavy teaming over them if a reasonable appropriation is made.

The sidewalks in our city are not what they should be in a place of this size. We have no permanent walks of any account, which is much to be regretted.

I sincerely hope that an effort will be made this year toward the placing of either brick or concrete walks in the main portion of our city, with good edgestones and extend each year until each street has good permanent walks.

An appropriation of \$1,000 was made for edgestones where the abutters pay one-half of cost of same, and many have placed edgestones in front of their residences.

I think an effort should be made to induce people to improve their property in this way and at the same time greatly benefit our citizens who travel over them. A good sidewalk cannot be made without edgestones. Gravel washes into the gutters and is carted away by teams in cleaning our streets and a grass border is soon grown to weeds and is unsightly.

The money appropriated for paved gutters and stone crossings has been used in the different sections of the city where most needed, and is a permanent improvement.

The bridges, culverts and drains have been attended to as usual and several new drains have been laid, and several relaid this past year. Some repairs have been made upon Quincy Point bridge and the cost of the same paid by the City of Quincy, and Towns of Weymouth and Hingham. Neponset bridge will require replanking in 1893.

The cost of removal of snow during the past year was quite large, owing to the large amount of snow. The snow storm in March being the most severe for several years.

The collection of garbage has been attended to as last year. The calls upon this department is increasing yearly, and also the calls for the removal of ashes and rubbish, soon requiring an additional team and a larger appropriation.

The streets are lighted the same as last year, with arc, incandescent, gas and oil lights. But few new lights were added. Some complaint has been made this year about many of the lights not being lighted at all times, and also the quality of some. No system, or kind of light can be made perfect at all time, and when lights are reported to me as not in proper order, they are immediately reported to the proper parties for adjustment, and they are usually, promptly put in condition. A few additional lights could be placed to good advantage.

Early in June the City Council appropriated \$1,000, and ordered an assessment upon the abutters along the line of streets which were ordered to be watered of an additional \$1,000, making the sum of \$2,000, to be expended in watering Washington street, a portion of Adams and Hancock streets, Franklin, School and Copeland streets.

A contract was made with Wilson Tisdale to do such work and fairly good results were obtained. With better and more modern carts much more satisfactory work could be done and the question of street watering, way and manner of doing the work, territory to be covered and manner of assessments are questions to be early considered.

There is no question of the desirability of doing this work in my mind, as the saving to our streets by so doing is considerable, and I believe will nearly pay the cost of such work to say nothing of the health and conveniences of our citizens.

The construction and repair of public buildings of our city remain, as last year, under my charge. Many repairs are found to be necessary to maintain our school buildings in habitable condition, as they are subjected to the hardest kind of usage. A larger sum than was allowed for this purpose could have been used with good results as some needed repairs were obliged to be left undone for want of means.

A new brick school building of eight rooms, called the Lincoln school has been erected during the past year on Brooks avenue, in Ward Three. The contract for the building was signed April 23, by James McNeil, of Boston, and was dedicated by the city, September 10, 1892, all within a period of less than five months. The contract price was \$24,064; but small additional expenses were incurred, and the city is to be congratulated in obtaining so well constructed and convenient school building at this price.

The sum of \$500 was transferred from the appropriation for building the Lincoln schoolhouse for the purpose of placing edgestone around the lot and building a gravel sidewalk. This has been done as ordered. The lot is, as yet, imperfectly graded, and a fence is also asked for by the adjoining owners of property.

These matters will require attention this coming year.

I was instructed to contract for a brick Central Fire Station to be erected on land at the corner of Quincy avenue and High School avenue and a contract was made with Messrs. Eldredge & Sylvester of Campello, Mass. The contract was signed July 26th and work soon commenced. It was expected that the building would be completed and ready for occupancy by January 1st, 1893, but delays have been encountered from the start. Owing to the lock-out of the stone cutters the cellar was delayed, also delays were met in the delivering of brick and lumber, consequently the building will not be completed as early as was expected.

I again thank His Honor Mayor Fairbanks, the various officers of the City Government and the citizens in general, for their support and encouragement during the past year.

I have devoted my entire time and best endeavors to serve the city's interest, and have endeavored to receive full value for all moneys spent in the various departments under my charge.

Respectfully yours,

W. WALTER EWELL,

Commissioner of Public Works.

Quincy, Mass., Jan. 2, 1893.

PUBLIC BURIAL PLACES.

To His Honor, the Mayor of the City of Quincy:

The Managers of the Public Burial Places respectfully submit their fourth annual report.

MOUNT WOLLASTON CEMETERY.

The amount of money received from the sale of lots during the year is \$970 00.

The amount received for labor on lots is \$1,091 95.

REPAIR FUND OF LOTS.

Five hundred dollars has been added to the "Repair Fund of Lots," making the total amount of said fund \$6,325 00. As it appears that this money has been applied in such manner as constitute a part of the debt of the city, your Board suggest that such action be taken as will establish and continue the same as a "Fund," giving a stated rate of interest, in accordance with the distinctly specified intent of the original establishment of said "Repair Fund," under the town form of government, and continued by an ordinance of the city.

GREENLEAF EXTENSION.

The "Greenleaf Extension" of the cemetery has been fenced and a plan made of streets, paths and lots, and work will begin on the actual laying out of the land the coming season. Your Board suggest that additional legislation by the Council will be required to give authority for such disposition of the proceeds of sales of lots as will carry out the plan as contemplated at the purchase of the land, viz.,—that some part of said proceeds shall be paid to the City Treasurer, to be applied towards the payment of the

land when the notes given therefor shall become due, also that the Board of Managers shall be further empowered, if necessary, to make such prices for lots as may be equitable and at the same time tend to produce the result above named.

APPROPRIATION.

Large extra outlays will be required the coming season, but your Board request only the usual appropriation of \$1,100, viz.:—\$1,000 for the Mount Wollaston Cemetery and \$100 for the Hancock Street Cemetery.

FINANCIAL STATEMENT.

Respectfully submitted,

JOHN HALL, CHAIRMAN.

GEO. L. GILL, SECRETARY.

POOR DEPARTMENT.

HONORABLE H. O. FAIRBANKS, MAYOR OF QUINCY:

I herewith submit my Annual Report as Overseer of the Poor for the City of Quincy, year 1892.

I congratulate the City that there has been no unusual demand on the City the past year. Our Almshouse is in the charge of Mr. and Mrs. Franklin Jacobs, who have faithfully fulfilled their trust. There were 11 inmates in the Almshouse January 1st, 1892. Admitted during the year, 19; died, 5; discharged, 16. There are remaining January 1st, 1893, 9.

I respectfully request the sum appropriated for the past year, \$7,200, with the income from the Poor Department. For statistics I submit my financial report,

Respectfully yours,

GEO. H. FIELD,

Overseer of the Poor.

Quincy, Jan. 2, 1893.

POLICE DEPARTMENT.

TO HIS HONOR THE MAYOR OF THE CITY OF QUINCY:

SIR—I have the honor to respectfully submit the following report of the Police Department for the year ending December 31, 1892.

Total number arrests	396
Males	393
Females	3
Americans	77
Foreigners	319
Residents	289
Non-residents	107

Cases before the District Court:

Assault	41
Assault with knife	1
Assault on officer	6
Breaking and entering	4
Bastardy	2
Cruelty to animals	2
Common brawler	1
Disturbing the peace	41
Drunkenness	230
Embezzlement	2
Escaped from Taunton	2
False pretences	2
Fraud	1
Fast driving	4
Gambling	6
Keeping gambling house	2
Insane	5
Larceny	9

Malicious mischief	2
Non-support of family	3
Keeping open shop Lord's day	1
Receiving stolen goods	2
Trespass	8
Tramps	2
Vagrants	1
Violation fish and game laws	1
Violation liquor law	8
Violation city ordinance	7
Number of arrests for drunkenness, 1891	135
Number of arrests for drunkenness, 1892	230
Number released from station house	203
Number released by court	11
Number committed to jail	16
Number of lodgers	468
Males	463
Females	5

MISCELLANEOUS WORK.

Buildings found open and secured	23
Defective sidewalks reported	8
Defective streets reported	5
Disturbances suppressed	3
Fire alarms given	4
Fires extinguished without alarm	1
Lost children restored to parents	2
Search warrants for liquor served	8
Search warrants for stolen property served	2
Street obstructions removed	6
Street lights reported not burning	461

The increase in arrests the past year was 103, 95 of which was for drunkenness.

This I attribute principally to the new drunk law. A person arrested in North or West Quincy after 12 o'clock at night for drunkenness, we are obliged to pay \$1.50 for a team to bring him to the station. In the morning he is released; if he has any money he takes the next train to Boston, or the electric car to Neponset.

Now I hope, and trust, that our representatives to the Legislature will do all in their power to repeal a law that is making drunkards.

In submitting my report I desire to express my appreciation of the courteous consideration I have received officially from Your Honor during the past year; also to tender my thanks to the officers and all others who have in any manner assisted me in the discharge of my official duties.

Respectfully submitted,

GEORGE O. LANGLEY,

Deputy Manager Police.

REPORT OF PARK COMMISSIONERS.

The Board of Park Commissioners respectfully submit the following report :

The sum of \$500 was appropriated at the beginning of the year for the support of the parks of Quincy. During the year a further sum of \$100 was received as rent of a portion of the Merrymount Park, and an additional amount of \$14 was derived from other sources, making a total of \$614 at the disposal of the Commissioners. The whole of this amount was expended ; mainly upon the Wollaston Park, in furnishing conveniences for those visiting the park, repairing and completing fences, and above all in restoring the natural features of the grounds, which had been somewhat seriously injured by taking gravel and other material for road-making, etc., from the slopes and ridges which constitute one of the marked characteristics of the spot. The Commissioners take this opportunity to express a hope that the natural features referred to, which are wholly of glacial formation, and on that account most interesting, will hereafter not be interfered with. To them the beauty and attractiveness of the ground are to a large degree due, and they should under all circumstances be preserved. There is a noticeable tendency on the part of those wishing to construct roads or fill up low ground to remove inequalities of surface ; they apparently regard picturesque glacial ridges, fringed with a growth of oaks and savins, merely as so much good gravel, furnishing excellent opportunities for borrowing, pits. They act accordingly, doing in a day, sometimes, damage which half a century of growth will not make good. It is to be hoped that the Quincy parks may not be subjected hereafter to further treatment of this sort. The injury heretofore done is not irreparable ; but, though the original picturesque outline has now in great part been restored, it will require at least twenty years to replace the destroyed trees.

The Commissioners had proposed to do a certain amount of work upon the Faxon Park, especially in the way of thinning out the undergrowth, so that the better class of trees would have ample opportunity for growth; they also wish to build a fence indicating the park limits. They have been unable to do this work for lack of funds, but propose, if continued in office, to enter upon it in the early Spring.

During the year the Commissioners have devoted much time and attention to a comprehensive examination of the needs of Quincy in the matter of parks and open reservations, and the development of its coast line, in connection with the plans now being matured by the Metropolitan Board of Park Commissioners, established by act of the last Legislature. As a result of these investigations they submit the accompanying report of Charles Eliot, Esq., professional landscape gardener, to which they would ask careful consideration.

The Commissioners feel a decided conviction that the time has come for the City of Quincy to approach this question of what may be called Public Reservations and Boulevards, in a large and comprehensive spirit. Under the system of unregulated development heretofore followed and now going on through the action of land companies and others, that is being done which cannot fail to work great and permanent injury, so far as the Quincy community is concerned, and which can hereafter be undone only at a very heavy cost. The whole matter could by prompt action now be regulated upon a well-considered plan with little trouble, and at no material expense.

In the remainder of their report, the Commissioners, therefore, propose to consider the two subjects of public reservations, including playgrounds, and boulevards, or coast drives, to a certain extent connecting the reservations and making them accessible.

So far as large reservations are concerned, Quincy is now better provided, through Merrymount Park and Faxon Park, than the great majority of other cities similarly placed. Nevertheless, some provision remains to be made in the way of playgrounds. It has always been the boast of Massachusetts that in many respects, so far as the people are concerned, the towns of the Com-

monwealth are in advance of those of other communities. However this may be generally, as respects playgrounds it is not the case. In a recent report on the subject of English education, the statement is made that in England "almost every town and village has its 'recreation ground,' supported by public money, and open at all time to school-children. In addition, each school has playgrounds, which are, where land is not very expensive, ample, and liberally supplied with equipment." Hardly any provision of this sort is made in Massachusetts; none at all in Quincy. In Quincy, as in other country towns, there has heretofore been traditionally so much open or pasture land that the need of public reservations in the nature of playgrounds has not made itself severely felt; but the time is coming when such need will be felt, and severely felt, unless some provision is speedily made.

Children have heretofore been able to find the necessary space for their games, etc., on private property, which they have been permitted to use more or less freely. To a certain extent this is still the case; but it cannot much longer continue. The growth of population will forbid it. On the other hand, it is futile to suppose that the future school-children of Quincy will grow up as they should unless some provision is made through which they can enjoy the out-of-door games which for all time have been the recreation and right of the young. Under the by-laws of every city the playing of ball, for instance, in public streets is very properly forbidden; yet this city has made, and is making, no provision whatever for any place in which the playing of ball can be enjoyed. Unless the want is hereafter to be made good at enormous cost, it cannot be supplied too soon.

The Commissioners, therefore, recommend that immediate steps be taken to secure adequate play grounds of not less than four acres in extent, one in each of the several wards of the city, which grounds shall be dedicated for all time to public recreation, especially that of children. The investigation of the Commissioners show that such grounds could now be obtained at a total cost, probably not exceeding \$50,000. A detailed statement has been prepared and can be submitted, showing where the grounds in question are located, and what would be the probable cost of securing them. A few years ago these

grounds could have been bought at an aggregate cost not exceeding probably \$5,000. The cost now will be not less than ten times that amount. If action is still further delayed, until it becomes a matter of absolute necessity to provide some such grounds, the cost may then not improbably be in the neighborhood of \$200,000. Moreover, were these grounds to be obtained now they need entail no further immediate expense. Having been secured, they would be safe for the future, and their development might safely be left to the next generation. Were these grounds secured, they, taken in connection with the Faxon and Merrymount Parks, neither of which are at present a source of very considerable outlay to the city, would constitute an ample provision, so far as can now be seen for all future time. Steps should immediately be taken towards securing such grounds.

The Commissioners are aware that even the outlay suggested, to wit, \$50,000, could not well be provided in the present condition of the finances of the city. On the other hand, they have reason to believe that the Board of Metropolitan Park Commissioners propose to recommend to the coming General Court the passage of a law outlining special financial arrangements to enable cities or towns desiring so to do to secure parks and play grounds. Should this become a law, it would be practical for Quincy to act at once without involving any considerable addition to its annual tax levy. The foregoing recommendation of the Commissioners is made, therefore, contingent upon the passage by the General Court of such a law.

Coming to the next matter above referred to, that of boulevards and coast roads, the Commissioners herewith submit a plan for the laying out and future development of the entire bay front of Quincy, from the Neponset through Atlantic, along the Squantum shore, through the Norfolk Downs, the Soldiers' Home and the Mount Wollaston Farms to Houghs Neck, and thence, by way of Germantown to Quincy Point. This scheme, as will be seen, is comprehensive in character, and, if adopted, cannot fail, in process of time, to add very considerably to the value, as well as the attractiveness, of the entire shore front of Quincy. All that is now recommended is that the plan should

be adopted, so that future streets and buildings shall be laid out or constructed in subordination to it. It involves, also, the establishment of grade lines with a view to future systems of water supply and sewerage.

Should this plan be adopted, and future developments made in strict accordance with it, working always upon a system and in subordination to plan, the results to Quincy will be of a most important character; for it must be looked at in connection with the general scheme of development included in the forthcoming report and recommendations of the Board of Metropolitan Park Commissioners, and of which it will in fact be a part. Should the whole general plan be carried out it will in time result in a system of boulevards, or coast roads, along the shore of Boston Bay which must always be a favorite popular resort in summer, and upon which residences will gradually be built; ultimately making the entire coast line of Boston Bay a public reservation of the most attractive and beneficial character.

This plan, both as a whole and in the part specially pertaining to Quincy, is deserving of most careful consideration, especially in view of the fact that its adoption only is now necessary. Should it be adopted its advantage to the future city of Quincy is apparent. That process of development which is now going on regardless of plan and at a great sacrifice of natural advantages, as well as beauty, would then be done systematically, and working to a given ultimate result.

Especially do the Commissioners wish to emphasize the fact that, while the adoption of the plan involves no immediate appropriation of money, the scheme itself cannot wait. The development process has been going on regardless of plan; it now is going on regardless of plan; and, if no well-considered scheme of improvement is adopted, it will inevitably continue so to do. It might, on the contrary, quite as well go on systematically and in subordination to plan. It would cost no more. The injury already done, where not irreparable, can be made good only at a large expense, the whole of which might by a little foresight have been saved; the future can be provided for at no expense at all. But action cannot safely be deferred.

The Commissioners refer to the report of Mr. Eliot and the maps and plans prepared by Mr. Whitman, accompanying this report, and also to the draught of a proposed act establishing a grade line.

CHARLES F. ADAMS,	} Park Commissioners.
CHARLES H. PORTER,	
WILLIAM B. RICE.	

MR. ELIOT'S REPORT.

HON. CHARLES FRANCIS ADAMS, CHAIRMAN QUINCY
PARK COMMISSION.

MY DEAR SIR:—In accordance with your request I have personally inspected the shores of Quincy Bay from Moon Island around to Nut Island, and I now beg leave to submit the following report upon the nature of this coast, together with certain recommendations as to the future development thereof.

The city of Quincy is most favorably placed. Behind her rise the rocky ridges of the Blue Hills, beside her on either hand flow the Neponset and Weymouth rivers, and at her feet is spread the Bay. The accompanying map displays the peculiar symmetry of the situation. The peninsula of Squantum, beside the mouth of the Neponset, is matched by that of Hough's Neck, beside the mouth of Weymouth river. Hangman's Island lies nearly in the middle of the space embraced by the two peninsulas; and Black's Creek, the only considerable break in the shore line of the Bay, again lies near the middle both of the Bay's curve and of the city. Just here too there appears another fortunate feature in the geography of Quincy, namely, the deep valley of Furnace Brook, a stream which seems to have been made to flow where it is on purpose to provide the inhabitants of the interior region of West Quincy and East Milton with an easy and beautiful route to the central portion of the Bay shore. The existing Adams street follows first one side and then the other side of this valley, by a route which involves

many ascents and descents ; but when the city shall have taken possession of the bottom of the valley, as it should for sanitary reasons (if for no other), it will then be possible to lay out a road which by following the stream will avoid all ups and downs, and by which Black's Creek and the Bay will be reached very pleasantly and easily. Streams like Furnace Brook are awkward things in cities. They cannot be done away with, because their channels are the only ways by which storm waters can escape. They cannot safely be allowed to be walled up and arched over by private abutments ; as was proved a few years since when Stony Brook in Boston burst its bonds and flooded a densely populated district, causing a large loss of property and putting Boston to the expense of enlarging and rebuilding the whole length of the channel. They can be made and kept surely safe and clean, only where they are owned by the public ; and, where they are so owned, a drive along one or both sides of the stream naturally comes in time. Private enterprise, desirous of reaping high prices for building land situated on the slopes of brook valleys, has adopted this sensible treatment in several instances, and the city of Newton is just now carrying out a work of this kind along her Cheese-cake Brook. It seems to me very evident that Quincy should at least possess herself of this valley before it becomes more thickly inhabited.

Descending now this valley of approach, the tide is met at the old dam of Black's Creek about half a mile from the open Bay. Here there is a charming view down the Creek, comprising a distant glimpse of the Bay, with perhaps a sail or two, the winding Creek itself and its accompanying salt meadows, two or three boats moored in the Creek, and for a frame a varied bank of oaks, pines and cedars on either hand. There is no better composed landscape in all the neighborhood of Boston ; and certainly there is none prettier.

Should not the city of Quincy own and control this bit of scenery, lying as it does on the way to the Bay ? The northern and western bank of the Creek for half the distance from Hancock street to the Bay is, indeed, already in the possession of the city, being a part of Merrymount Park ; but the two knolls or islands of oak woods which lie seaward from the park and

make part of its scenery are still in private hands, as is all the southern and eastern shore of the Creek. To defend the outlook from the existing Park and at the same time to preserve the beautiful picture of Black's Creek it will be advisable for the city to acquire by gift or purchase the land between the stream and entrance to the Mt. Wollaston estate, and from this point seaward a strip along the wooded bluff averaging three hundred in width. Butler road continued to the Mt. Wollaston entrance would thus become the boundary of the Park, and a similar road might ultimately become the boundary along the Mt. Wollaston bluffs. Houses fronting on the reservation would naturally follow the opening of such bounding roads, and in this way a consummation most advantageous to all concerned would be reached. Black's Creek would be preserved to delight the people of the future, the outlook from the knolls of Merrymount would be saved from threatened disfigurement, and real estate along the new park border would be greatly increased in value and attractiveness.

On the opposite or northern side of Merrymount Park the situation is much the same. Here the northern arm of Black's Creek, with its accompanying salt marsh, penetrates the mainland almost up to Fenno street. If the city does not acquire this marsh and a strip of the upland beyond it, the view from the northern slopes of Merrymount Park will become in time greatly disfigured by the backs and back-yards of buildings on the upland, if not by even more objectionable structures or industries established upon the marsh itself. Conversely, if the marsh and its border is thrown into the reservation, disfigurement will be prevented, and the abutting real estate will be given such a value as will ensure its respectable occupation. Nothing need here be added as to the oak knolls which lie towards the mouth of the Creek. They appear prominently in every view from either bank of the stream and their permanent conservation is obviously essential to the completion of the Park. The marsh behind the knolls would also be just as essential as the other marshes already mentioned did it not belong to a permanent institution, the National Sailors' Home, whose managers are not likely to devote it to any but agree-

able purposes. The burying ground of the pensioners lies on a knoll at the edge of the marsh, and it does not seem necessary that public ownership should be carried further inland at this point.

Coming now to the flaring mouth of Black's Creek and the shore of the open bay, the little bluff of Rufe's Hummock on the one side or the greater Gunning-Stand bluff on the other, command the situation, and offer fine views across the water to the rounded hills of the distant islands of Boston Bay, with glimpses of the open sea between the islands. To right and left are seen the extended arms of Hough's Neck and of Squantum, embracing between them Quincy's own bay of open water, two and a half miles wide from cape to cape, and two miles deep. The shore in both directions is seen to be composed of dwarf bluffs of gravel alternating with low sea wall beaches, behind which lie salt marshes sometimes threaded by little creeks. This is not "a stern and rock-bound coast," neither is it in any way impressive or grand, and yet every careful student of the circumstances is quickly brought to the conclusion that for the growing city of Quincy not to possess and control this shore would be foolishness of the most flagrant sort. The members of the Commission I am addressing are fully alive to the facts of the situation, and they can undoubtedly soon bring the main body of the population to perceive and to act for its self interest in this matter. This is one of those cases in which our American communities are free to work their own good will. "Enlightened self-interest" should very soon here work a beneficent result.

As for the owners of the shore front, they will undoubtedly be quick to see what is for their interest in the matter. Private ownership of the shore in small lots means that only the front lots will command special prices. Public ownership means that every house lot for a mile back will possess an enhanced value, Public ownership will also tend to insure the water front from encroachment by the sea, and from occupation by value depressing trades.

Now when public ownership of the shore is decreed, what considerations should govern the placing of the line which shall thenceforth divide private from public property? My answer to

this question is recorded upon the accompanying map, but it had better perhaps be outlined in words here. Although the work will not need to be undertaken for many years, it will doubtless be ultimately desirable that the public should possess a driveway along the shore. It follows that the boundary of the public domain should be so placed as to allow of the easy construction of such a driveway, and its easy connection with the streets of the city. The map is the result of my traversing of the shore with this idea in mind. Beginning at Black's Creek and going north towards Squantum, I believe that the Park Commissioners should acquire possession of all that lies seaward from the brink of the several little bluffs of the shore. This means that the Board would generally control the slopes of the bluffs, as well as the beaches and the flats, and that the shore drive would ultimately find its place along the bases of the bluffs at the water's edge. I do not advise continuing the public reservation beyond Moswetusset on Sachem's Hummock, because the existing road from there to Moon Island affords a pleasant drive, and because there is good hope that this portion of the circuit of Quincy Bay may be obtained for the public by the proposed Metropolitan Parks Commission, which will be interested in opening this route to Moon Island for the benefit of the people of Dorchester, Milton and Hyde Park.

Beginning again at Black's Creek and going towards the Great Hill, the bluffs are for some distance so continuous and so even that enough space for the future shore drive should here be acquired on their summits, where the reservation and the houses which will some day front upon it, will command fine views of the bay, the islands and the Broad Sound towards Nahant. Passing the Shell Place, Post Island and Whale Landing, the existing Manet Ave., widened somewhat on its inward side, should be taken into the reservation up to the point where it turns inland, and from this point to the cove at the foot of the Great Hill, I propose that only the slopes of the bank should be acquired, and that the future drive should follow the base of the bluffs. A circuit of the Great Hill itself, including the lowest of the Land Company's plotted roads, with possibly Nut Island, would then complete Quincy's

shore reservation in a manner which would leave little to be desired.

In conclusion, let me express my thanks to Mr. H. T. Whitman for his cordial assistance.

Yours respectfully,

CHARLES ELIOT.

The Exchange Building, Boston, 2 Jan., 1892.

THOMAS CRANE PUBLIC LIBRARY.

The Trustees of the Thomas Crane Public Library submit herewith their annual report, being the twenty-second of the whole series since the Library was opened.

The number of books purchased during the past year was 670, of which 546 were credited to the foundation fund, or city appropriation, and 124 to the income from the Cotton Center Johnson fund. There have been 580 volumes rebound, and 307 volumes worn out in use have been replaced by new copies of the same books. There have been 135 pamphlets added to those already in the possession of the Library. The number of names on the Library register is 11,004, and of this number 625 were added during the year. The Library was opened to the public 305 days.

The division of reading matter in the books borrowed during the year 1892 is set forth in the following table :

	PUBLIC	SCHOOLS	TOTAL	PER CENT
Fiction . . .	24,667	328	24,995	34.4
Periodicals . .	16,252	396	16,648	22.9
Juvenile Fiction	14,714	1,331	16,045	22.0
History . . .	2,832	633	3,465	4.7
General Literature	2,825	143	2,968	4.0
Arts and Sciences	2,241	207	2,448	3.3
Travels . . .	1,836	337	2,173	2.9
Biography . . .	1,744	403	2,147	2.9
Poetry . . .	1,153	78	1,231	.5
Religion . . .	371		371	.5
Educational . .	153		153	.2
	<hr/> 68,788	<hr/> 3,856	<hr/> 72,644	

The percentages in the foregoing table do not vary in any material respect from those in the similar tables in the reports for three years immediately preceding.

The attention of the Trustees has of late been more and more drawn to the over-crowded condition of the shelf room of the Crane Memorial Hall. This has naturally resulted from the fact that 500 volumes on an average are each year added to the collection. It began with about 4,600 volumes, and it is now entering upon the twenty-third year of its existence. During these twenty-two years, in the neighborhood of 14,000 volumes, or three times the original number, have been added by purchase or gift. The library consequently may be likened to a reservoir, into which streams of considerable volume are always pouring, and from which there is no outlet. Under this process, there is necessarily a large accumulation of what may not inaptly be described as literary sediment,—that is, books either of ephemeral interest, or small original value, or not adapted to the use of a public library like that of Quincy. These are placed upon the shelves, and, though very rarely, if ever, called for, remain there, taking up room needed for works of a better class or in more immediate demand. This condition of affairs, common to nearly all libraries, may go on through a number of years; but it is obvious that the time will come, soon or late, when a measure of relief must be applied. Shelf room is nowhere unlimited; and in the case of the Crane Memorial Hall, must soon be exhausted.

At the beginning of the year the Trustees found themselves confronted with this situation. The shelves were as yet not seriously over-crowded, but the collection already contained about 19,000 volumes, and there were no accommodations for over 20,000, unless extensive changes were made. It, therefore, became necessary to decide on the policy to be pursued in respect to the acquisition of books and future growth of the library.

As the result of an experience now stretching over more than twenty years and of careful observation of the use made of the library, the Trustees concluded that it ought to be regarded, and in future developed, as a collection of books for popular refer-

ence, consultation and reading, and not as a collection designed for the use of scholars or specialists. It is, in their opinion, both futile and unwise for a city like Quincy, in the immediate vicinity of Boston, to attempt to have a large general library. Such a library must necessarily contain at least 40,000 or 50,000 volumes, and should, to be at all complete, contain 100,000. There are no less than three collections of this character in Boston or its immediate vicinity,—the Boston Public Library, the Harvard College Library, and the Boston Athenæum,—while there are a number of special libraries,—medical, legal, historical, scientific and religious,—which are designed to have as complete collections as possible of works relating to their several departments. Under these circumstances, should any inhabitant of Quincy who may be pursuing a special line of investigation or study wish to obtain or consult books relating to a subject other than those of a general and elementary character, the proper place for him to go for those books is to either one of the three great general libraries or to some of the special libraries. Even should any books of special rarity or value find their way into a library situated as a Quincy Public Library is, it would be far better that the Trustees should get such books by exchange or otherwise into the libraries of Boston or some special library than that they should retain them upon their own shelves. Books are made to use, not to hoard away or to conceal. They are of no earthly value except in so far as they are used; and in order that they may be used they must be accessible. A rare, costly or purely professional book, not of an elementary character, is merely hid away upon the shelves of a local library like that of Quincy. No student or general investigator, even if living in the city, would ever look for them there. He would look for them at one of the libraries above referred to; and to those libraries students and investigators can always obtain access. Accordingly, the proper place for such books is in those libraries, and not in the local and incomplete collections.

The public library of a city like Quincy should, on the other hand, be made as complete and as available as possible for general, popular use, whether by old or young. It should contain

all the standard works in the language, and a good assortment of practical treatises and of the best works of reference. Above all whatever it has should be made easily accessible to persons of average intelligence, and every facility should be afforded for its use. It should in a word be a people's working and educational institution.

If this end is kept in view, it would follow that a sufficient library such as Quincy needs could be brought together within the limit of 10,000, or, at the outside, of 15,000 volumes: but, in order to keep the library within those limits, a judicious and continual process of winnowing is necessary; all duplicates and books of ephemeral interest, nearly all books relating to specialties and most rare books being from time to time removed from the shelves, and either destroyed or sent elsewhere.

Acting on this principle, the trustees during the past year have removed from the shelves of the Thomas Crane Library 1,070 duplicate volumes and 1,075 other volumes, principally public documents—in all, about a tenth part of the collection. The public documents thus removed afford a good illustration of the principle upon which the trustees have acted. It is obviously impossible, even were it desirable, for a library like the Thomas Crane Library to have complete sets of these documents, whether State or National. They would fill its entire shelf room several times over. On the shelves and in the attic of the Crane Memorial Hall there were at the beginning of last year probably 2,000 volumes of these documents. During the whole twenty years the library has been in use it may fairly be questioned whether 100 of these volumes have ever been consulted, or by as many as ten persons. Any one wishing to consult such works would naturally look for them in Boston at the library in the State House. Indeed, it would be far more convenient for him to consult them there than at Quincy, even though he might live in Quincy; for at the State House he would be sure of finding what he wanted, whereas at Quincy it would be a chance whether he would find it or not. In the case of the Crane Memorial Hall, the public documents therefore took up more room than they were worth.

Of the equal number of duplicates, or books not considered useful, also cleared from the shelves, a portion were sent to other libraries; such as were there desired were given to the High School as the nucleus of an historical school library; the rest were sold to dealers in old books for what could be got for them.

But in the case of a popular reading and working collection, it is quite as important that the books in it should be readily accessible as that they should be intelligently selected. A mass of unarranged, uncatalogued volumes is, so far as popular use goes, little better than so much rubbish; and the size of the library affects very directly the practicability of keeping it accessible to the public. It is a difficult, but not insuperable, task to catalogue, and keep catalogued, for general public use ten thousand or even fifteen thousand volumes; it is practically impossible to catalogue for general public use one hundred thousand volumes, and then afterwards to keep them and their accretions so catalogued. Both labor and expense prevent it.

The interests of Quincy, therefore, will, in the judgment of the Trustees, best be served by keeping the collection within the limit which admits of reasonably frequent revisions of the catalogue, so that it shall include all the works on the shelves. As there are now 16,800 volumes on the shelves, these should undergo a further reduction of 1,800, in order to bring the number within the limit (15,000) of reasonable catalogue work. If that limit is exceeded, the excess above 15,000 volumes, composed of books rarely called for, should be omitted from the printed catalogue and rendered accessible in some other way. Should this policy be strictly followed hereafter, the collection will never become unwieldy, and can always be made to serve its true purpose as an available public library for exclusively popular use.

The last catalogue of the library was printed seventeen years ago. During those seventeen years over 10,000 volumes have been added to the collection, the bulk of which have been catalogued in the three supplementary catalogues from time to time, generally at intervals of about five years (1879, 1883 and 1888), prepared and issued by the Trustees. The last of these supple-

mentary catalogues was brought out in 1888, nearly five years ago. Since then some 3,000 volumes have been placed upon the shelves; these consequently are included in no printed catalogue, and their presence in the library can be ascertained only through the disagreeable process of consulting the card catalogue. It is, therefore, at this time difficult to say what books are or are not in the library; and this difficulty is constantly increasing, until at no remote day it must become most serious. The old catalogue of 1875 and the supplements to it are also becoming more and more defective, owing to the destruction of books through long use, not all of which can be replaced, and to the fact that many volumes included in the catalogue are among those since cleared from the shelves.

No library can be made readily accessible to the mass of those people composing a community through a card catalogue. At best such a catalogue is inconvenient, and to consult it is almost an art in itself. A good and widely distributed printed catalogue alone makes a library accessible to the general public, old and young. Ten thousand volumes made accessible in this way are, as a town or city library, more practically useful than a hundred thousand buried under their own mass.

In the case of this library the difficulty is financial. The publication of a catalogue involves serious labor and large expense. It will probably cost, including the labor of preparation, between \$2,000 and \$3,000. The trustees are not disposed to call upon the city for a special appropriation of this sum; but, in order that they may not be compelled so to do, it is their design to enter upon a definite policy of accumulation. They have already, through fines, sales of material, and other sources, accumulated a small fund, with which to defray the cost of a catalogue when such a cost must be incurred, amounting already to between \$500 and \$600. They propose now to hasten the accumulation of this fund so that it shall suffice to meet the cost of printing a wholly new catalogue in the year 1895, when the present catalogue will have been in use twenty years. The collection will by that time have undergone such changes as to be almost a different library. With this end in view, it is proposed hereafter, in-

cluding the present year, to purchase a smaller number of new books, now, for want of a proper catalogue, to a large extent inaccessible to the public, and to set aside one-half of the dog tax as an accumulating catalogue fund. The provision thus made will insure the possession of a fund amply sufficient for the publication in 1895 of a wholly new catalogue of the library as it shall then exist; and this catalogue, when published, having been paid for out of the savings accumulated by reduced purchases of books, should be sold, irrespective of cost, at a price so low as to put it within the easy reach of any one wishing to use the library. In this matter as in the matter of the books composing the collection, it cannot too clearly be borne in mind that catalogues are printed for use; and that to be used they must be generally distributed. Experience has also shown that very few families in any community care to incur the expense of buying a high-priced catalogue. They are unwilling to pay for it anything approaching its cost, which, in the case of a library of 10,000 volumes, will be in the neighborhood of \$2.50 a copy, if an edition of one thousand copies is printed. Those who make the largest use of our town public libraries also,—people who do not own books and are unable to buy them,—can ill afford such an expense; yet, in the case of Quincy, a collection for popular use of ten thousand volumes, with a catalogue of them in every other house, will be of infinitely greater public and educational service than four times that number of volumes with catalogues only on the library tables of the Crane Memorial Hall. A good catalogue periodically revised and republished, and generally distributed at a nominal price, is thus, as an accessory to a library, wisely secured through a reduction in the number of volumes purchased, which without it are to a large extent inaccessible and, practically, worthless.

The wisdom of the policy here outlined, both as respects the increase of the library and the rendering of the books in it accessible, is believed to be apparent. The trustees take this occasion to enlarge upon the subject, not because any reasonable doubt in regard to it can be entertained, but in order to make it a matter of record both for the present board and for those

composing any future boards hereafter appointed. It is most desirable that in these important respects no shifting or uncertain policy should be pursued.

FRED A. CLAFLIN,

Treasurer.

FIRE DEPARTMENT.

TO HIS HONOR, HENRY O. FAIRBANKS, MAYOR OF QUINCY :

SIR:—I have the honor, for the fourth time, to submit to you the annual report of the Fire Department, ending December 31, 1892, in compliance with the requirements governing the same, together with a list of the members, with their rank, age, occupation and residence, location of fire alarm boxes, fires and alarms, also inventory of property in possession of the department at this date. A few suggestions would, in my opinion, also be in order at this time for the future benefit of the department.

FORCE OF THE DEPARTMENT.

The force of the department remains the same as last year, and is as follows: one chief engineer, six assistant engineers (one from each ward, as charter provides), six permanent men, and sixty-three call members; also one man who takes care of Chemical Engine No. 1, located at Houghs Neck, making the entire force of the department seventy-three men. And I have only to repeat other reports that I have made when I say that there are no better workers and none more willing, in my opinion, in any fire department, than in that of the City of Quincy.

APPARATUS.

The apparatus remains the same, and consists of one Amoskeag steam fire engine, one hook and ladder truck fully equipped, with the exception of one additional extension ladder, which will be added next year. Three hose wagons, one hose reel, four wheels, three hose jumpers, one supply wagon, one light express

wagon, for fire alarm purposes, one hose pumg, two chemical engines and one hand engine. You will notice a little difference in the report of last year and this. Instead of two four-wheel hose reels, there is now but one, I having changed the same into a jumper, which now makes three jumpers instead of two. The hand engine (the Granite) was not mentioned last year for the reason it not being in service and also not being stored in any of the department houses. I had entirely forgotten about it until my attention was called to it in rather an uncourteous manner. The value of this engine is perhaps about twenty dollars for old junk. Hose two, the relief wagon and the fire alarm wagon have been painted and fixed up this year, and at this date are in good repair. Hose three and chemical engine No. 2, also hook and ladder No. 1, are badly in need of repairs and paint, and should have a thorough going over, and so far as the Council may think proper these repairs will be made in the near future. As I recommended in my last report that the addition of a chemical engine, located in the vicinity of the City Hall, would be of great service, I will improve this opportunity in calling the special attention of the Committee on the Fire Department to this particular part of this report, and would be pleased to confer with them at any time convenient for them so to do.

The hose reel now located in Ward Two, I would recommend being moved to the new Central Station and held in reserve, and a new Hose wagon placed in its stead with hanging harness and other equipments, the same as Hose Two and Three. Hose Four, at the present time, is the poorest equipped piece of apparatus in the department and it is the opinion of your Chief Engineer that Ward Two is entitled to as good as any other part of the city. In recommending the hose reel to be removed to the new station and held in reserve I do so for the following reasons. It is of course to be kept always ready for immediate service, and in case of a large conflagration where additional hose is wanted, it can be got at much quicker than if hose had to be lowered from the tower and loaded on to a wagon. Also valuable time would be saved after reaching the scene or place where the same is wanted. The cost of a new wagon would be about three hundred dollars.

FIRE STATION.

In regard to the several fire stations I am somewhat at a loss what to say. We have a Central Fire Station now under way and will probably be ready for occupancy about April first. In regards to new fire stations for Wards Two and Four, I believe the Committee was unable to report further than in their judgment, the ones now being used were entirely unfit for fire station purposes. Locations for same seemed to be the hardest thing to get over, which are, of course, the facts of the case. It being referred to the new Council, it is hoped by your Chief Engineer that the Committee on Fire Department will give this their early attention. The hose house in Ward Five is too low posted, but with an expenditure of about two hundred and fifty dollars it could be put in a condition that would answer for some time to come. Said station also needs painting, also the station at Houghs Neck needs painting. There are so many things needed that I hardly dare mention them all for fear some one will say "hold up, go slow." But your Fire Department must not go slow and where so much is expected of them they must have tools to work with.

HOSE.

We have at this date about 7,300 feet of hose in apparently good condition, and about 450 feet that is not reliable. About 400 feet has been condemned this year. I would recommend the purchase of 1000 feet new hose which will make up for losses, also be a small addition. The hose for chemical engines 1 and 2 will answer if no serious accident should overtake them.

WATER.

Now that the city owns her own plant and will no doubt have the indisputable right to extend the pipes wherever and whenever the Water Commissioners think it proper, and the Council appropriate money for the same. I shall expect a large addition of fire hydrants in all parts of the city. It is hoped that the Council of 1893 will be very liberal with this

department. It not only appears proper but I feel it my duty to again call your attention to the Houghs Neck district. There are now about one hundred and fifty or one hundred and seventy-five buildings in that district, the value of which is not less than one hundred and seventy-five thousand dollars. There is nothing at the present time for fire service that can be depended on in the shape of water, especially at low tide, or when the tide is not about full. I believe it would be a paying investment for the city of Quincy to extend water mains to Houghs Neck, said mains to be large enough to supply fire hydrants, and recommend the same being done at an early date.

RESERVOIRS.

There are sixteen reservoirs, ten of which are supposed to be self-filling and on December 3, were in fair condition. As I have no confidence in them whatever (with the exception of three or four) I believe it is money thrown away to even clean them out or to keep the snow shoveled off in the winter.

FIRE ALARM.

The fire alarm under the care of Gilbert M. Wight, who has had the care of same for the past four years, has worked well and much credit is due to Mr. Wight for the good and efficient service rendered.

There is at this time about thirty-one and a half miles of wire all in one circuit. This will, in all probability be cut up in four or more circuits at an early date, as the Council of 1892 made a commencement in that direction. The cost of the outside work I am not able to estimate at present, but will forward the same as soon as weather and circumstances will permit. The Houghs Neck loop also will be commenced as soon as weather permits. The fire alarm apparatus now in line is as follows: one automatic steam whistle attachment, four bell strikers, five large gongs, seven tappers, and thirty-four pull or signal boxes, four of which have been added this year.

LOCATION OF SIGNAL BOXES.

- 21 Cor. Granite street and Cranch place.
- 23 Cor. Hancock street and Cottage avenue.
- 25 Cor. Newcomb and Canal streets.
- 26 Unitarian Church.
- 28 Cor. Greenleaf and Hancock streets.
- 34 Cor. Main and Union streets.
- 35 Cor. School and Hancock streets.
- 37 Cor. Franklin and Water streets.
- 38 Cor. Liberty and Plain streets.
- 39 Cor. Liberty and Penn streets.
- 41 Cor. School and Granite streets.
- 42 Jones' corner.
- 43 Cor. Copeland and Common streets.
- 45 Cor. Willard and Crescent streets.
- 46 Hose House No. 3. Copeland street.
- 47 Cor. Bates avenue and Grove street.
- 48 Cor. Willard and Robertson streets.
- 49 Cor. Willard and Larry place.
- 51 Linden street, Tubular Rivet Co. factory.
- 52 Cor. Farrington and Brook streets.
- 53 Cor. Warren and Winthrop avenues.
- 54 Cor. Hancock and Fenno streets.
- 56 Wollaston Hotel.
- 57 Wollaston Park.
- 58 Cor. Adams and Beale streets.
- 59 Beale street, near Grand View avenue.
- 61 Cor. Hancock and Squantum streets.
- 62 Cor. Hancock and Atlantic streets.
- 64 Cor. Newbury and Billings streets.
- 68 Squantum Heights.
- 71 Cor. Mill and Washington streets.
- 72 Cor. South and Washington streets.
- 73 Cor. Winter and Howard streets.
- 75 Cor. Sumner and Main streets.
- 135 Weymouth.
- 137 Braintree.
- 158 Milton.

- 2 Blows, recall, "all out."
- 2-2 three times, one session in school.
- 1 blow for test, at 7 A. M., 5 P. M.
- 10 blows followed by box number denotes second alarm.
- 12 blows and box number denotes general alarm.
- 3 blows calls Chief to Central Station and denotes trouble of some kind.
- 3 blows three times, Police call and is to be put in only by order of some engineer.

TELEPHONE.

The central fire station and the residence of the Chief Engineer are connected by telephone. The service since Oct. 12, has been fair. Previous to that it was of very little use, especially in the night. The day operators have been very obliging and are always willing to transmit messages. I will recommend that the service which is now open or ground circuit be changed to a closed or metallic circuit. I fully believe the service would be enough better to pay the difference in the cost of same.

HORSES.

The horses of the department are at present, eight in number, one having been bought this year, and with the exception of one are in good condition and as good as can be had for the business. The horse stationed in Ward Four belonging to the highway department has given good satisfaction, yet your Chief Engineer is of the same opinion as he was one year ago and will simply repeat that part of his report where he says, that this team be transferred to the fire department, the driver of same to be made permanent, the team and driver to work on highways the same as they do at present within one-half or three-quarters of a mile from Hose 3 house. The actual time worked on high ways to be charged to same. This appears to be the most proper way, yet if the Commissioner of Public Works is satisfied with the present way of working this team your Chief Engineer has no particular fault to find.

In conclusion I wish to thank everybody for everything. I am under many obligations to the Assistant Engineers for their faithful assistance, also to the foremen, officers and members of the entire department for their successful efforts. The Committee on Fire Department, I wish especially to thank them for the courtesy shown me on all occasions: Ward 1, E. W. H. Bass, chairman; Ward 2, Herbert M. Federhen, Jr.; Ward 4, Charles L. Hammond; Ward 5, Frederick E. Litchfield; Ward 6, Louis Rinn, members of Committee on Fire Department.

For the valuable services that the Police Officers have rendered and their willingness in so doing, I wish to extend to them my thanks for the same.

The local press also have used the department exceedingly well and I improve this opportunity in thanking them in behalf of the department.

To his Honor the Mayor, Henry O. Fairbanks, I tender my profound thanks for the honorable treatment I have always received at his hands, and for the interest he has taken to keep up the efficiency and maintain the value of this department.

Very respectfully,

WALTER H. RIPLEY,
Chief Q. F. D.

HEALTH DEPARTMENT.

TO THE HON. HENRY O. FAIRBANKS, MAYOR OF QUINCY :

The Board of Health begs leave to present the following report for the year 1892.

The Board was organized Feb. 21, 1892 by the choice of J. M. Sheahan as chairman, G. B. Rice as secretary and B. F. Thomas, financial secretary.

Mr. Joseph W. Hayden was appointed Inspector and he resigned from the position May 2, 1892. The vacancy thus created was filled by the appointment of Mr. Adam Vogel, who before assuming the office had satisfied all the requirements of the civil service act. Mr. Vogel has shown himself an intelligent, active and business like official particularly during his connection with the small pox case of which more extended mention will be made later.

The number of meetings held during the year has been twenty-eight.

The following table of nuisances with the result of the Board's action thereon is furnished by the Inspector.

Number of inspections made three thousand six hundred and thirty-four.

Nuisances	Discovered	Abated
Unventilated drains	6	6
Broken sink drains	13	13
Sink drains stopped up	10	10
Imperfect privy vaults	27	27
Privy too near well	3	3
Privy too near brook	2	2
Uncleaned privy vaults	167	164
Uncleaned cesspools	151	149
Cesspools too near well	4	4
Filthy yards	41	41
Contaminated well	1	1
Sewage running into street	10	10
Sewage running under house	7	7
Sewage running into cellar	5	5
Sewage running on top of ground	41	41
Sewage running into brook	3	3
Filthy drains	10	10
Filthy cellars	6	6
Pig pens	3	2
Piggeries	2	2
Unburied carcasses	8	8
Decomposing fish offal	7	7
Decaying fruit	2	2
Decaying meat	3	3
Decaying vegetables	7	7
Stagnant pond of water	1	1
Broken sink spouts	4	4
Total	<hr/> 544	<hr/> 538

An increase in the number of complaints made and of consequent inspections will be noted. This fact is explained by the anxiety which during the latter part of the year was felt concerning an invasion of cholera.

The following group of statistics bearing upon the prevalence of contagious diseases is furnished by the secretary, with the expression of his regret that the physicians of the city are

not more obedient to the law which demands that each of them shall make prompt report to the Board of Health of any cases of contagious diseases occurring in his practice.

YEAR OF 1892.

A case of small pox was reported to the Board on June 24, by Dr. J. F. Welch, the physician then in charge. The patient, Anna Larsen, a native of Sweden, had come to Quincy June 15, directly after her arrival in this country, and was taken ill on June 21. The case revealed itself as small pox three days later and during that interval, eleven persons had been exposed to the contagion. The Board of Health lost no time in taking precautions against the extension of the disease. Ten of the persons who had already been exposed were removed to a building behind the almshouse where they were maintained in effec-

tual quarantine until July 12. The eleventh person was retained as nurse at the infected house and the services of a competent and experienced nurse were also secured from Boston. The neighborhood of the house in which the patient lay ill was placed in strict quarantine, and all persons who had been exposed to contagion were vaccinated at intervals of two days until the operation was successful.

After the recovery of the patient, the dwelling was thoroughly disinfected, most of the furniture, bedding, etc., being destroyed by burning. In spite of the extent to which the community had been exposed, we are happy to say that no second case made its appearance, a result which, we are sure, will be considered more than sufficient compensation for the expense incurred by reason of our measures of protection.

The work of clearing out, deepening and widening the water ways of the city has gone on in a satisfactory manner during the past year. Town brook, the brook on the Billing's estate at Atlantic and the brook which runs along the line of Water street have all been put in a safe condition and at a moderate cost.

In a preceding report, we took occasion to point out the danger to health caused by the use of wells as a water supply. We wish to repeat this word of caution. In order to make evident the reasons for our belief, we wish to call your attention to the extensive prevalence of typhoid fever in the region bounded by West, Centre and Willard streets. An outbreak of this disease occurs yearly on West street with perfect regularity. There is scarcely a house upon the south side of the street that has not been visited by it within the last three years, while some families have had three, four or even five cases of this malady. Some of these cases have of course proved fatal. Inasmuch as we are convinced that the disease is caused by use of the polluted water in the wells of this neighborhood, we recommend the early introduction of the Quincy water pipes into the territory in question.

In connection with this subject, we would also remind Your Honor of the singular epidemic of malarial or intermittent fever which has prevailed in the region about Bates avenue during the last summer.

Believing this epidemic to be due to the same cause, we suggest the same remedy, the introduction of the City water.

Following is a table of our receipts and expenditures for 1892 :

FINANCIAL REPORT.

Appropriation	\$650 00
-------------------------	----------

EXPENDED.

For inspections by J. W. Hayden	\$41 40	
For inspections by Adam S. Vogel	498 00	
W. D. Hills, M. D., analysing water	10 00	
Green & Prescott, printing	43 00	
Fred F. Green, printing	29 50	
T. Brady, burying dog	2 00	
Joshua Wilkins, board of horse	6 00	
S. K. Tarbox, flags	2 00

W. W. Ewell superintending work on brooks	50 00	
	<hr/>	\$460 02
		<hr/>
		\$29 98

In conclusion, we desire to thank Your Honor for the cordial collaboration which you have given us during the past year, and we wish to express to the Commissioner of Public Works as well as to the gentlemen composing the City Council our full sense of the courteous treatment which we have received at their hands.

Respectfully submitted,

JOSEPH M. SHEAHAN,
GEORGE B. RICE,
BENJAMIN F. THOMAS,

Board of Health.

Quincy, Jan. 2, 1893.

REPORT OF CITY PHYSICIAN.

TO HIS HONOR THE MAYOR, AND THE CITY COUNCIL :

GENTLEMEN—I respectfully present my annual report as City Physician. I have made during the past year, 120 visits to the outside poor, 40 visits to almshouse, 3 visits to the police station, and have had 30 calls at office.

Respectfully submitted,

S. M. DONOVAN,

City Physician.

INSPECTION OF MILK.

TO HIS HONOR, THE MAYOR OF THE CITY OF QUINCY :

I have the honor to submit the following report of the Department of Inspection of Milk, for the year of 1892 :

The principal duties of the Inspector, as defined by the statutes under which he acts, are the issuing of licenses, the registration of stores where milk is sold, collection and inspection of samples, and the enforcement of the laws in the courts.

LICENSES.

The statutes governing the sale of milk require that every person who conveys, in carriages or otherwise, the same for the purpose of selling within the city limits, shall be licensed annually by the Inspector of Milk, and shall pay fifty cents to the use of the city. Every person before selling milk, or offering the same for sale in a store, booth, stand or market place, shall register in the books of the Inspector and shall pay fifty cents. Licenses are issued only in the names of the owners, and may not be sold, assigned or transferred. Each license records the name, residence, place of business, number of carriages or other vehicles used, the name and residence of every driver or other person engaged in carrying or selling, and the number of the license.

The licensee is required to cause his name, the number of his license and his place of business, to be legibly placed on each outer side of all carriages or vehicles used by him in the sale or conveyance of milk, and to report to the Inspector any change of driver or other person employed. For failure to comply with these requirements, or for selling or exposing for sale, from carriage or other vehicle, without first being licensed, a fine of not less than thirty nor more than one hundred dollars may be imposed. Repetition of the same offence calls for still higher penalties.

Failure to register for the sale of milk from a store is punished by fine not exceeding twenty dollars.

INSPECTIONS.

The Inspector or his authorized collectors are empowered to enter all places where milk is stored or kept for sale, and all carriages used for the conveyance of milk, and may take samples of the same for analysis; and he shall cause the same so taken to be analyzed or otherwise satisfactorily treated, the results of which examination shall be recorded and preserved as evidence. The owner or custodian has the right to demand and receive a sealed portion of the sample, for his own use in case of complaint.

QUANTITY OF MILK SOLD.

The estimated number of quarts of milk for average daily consumption in the city of Quincy is four thousand nine hundred (4,900), of which two thousand five hundred (2,500) are raised in Quincy.

Number of licenses issued to dealers conveying milk, by carriage or otherwise, for purpose of sale	24	
Number of registrations of store- keepers engaged in the sale of milk	15	
Number of all others	6	
	<hr/>	
Total number of licenses and registrations		45
Number of samples of milk inspected during the year		100

The analysis of samples of milk taken by me show that, as a whole, the milk supplied to the people of Quincy is of good quality.

There have been no complaints made as to the quality of the milk, and no prosecutions.

CHARLES W. GAREY, M. D.,
Inspector of Milk.

Quincy, Mass., January 1, 1893.

INSPECTION OF ANIMALS AND PROVISIONS.

TO HIS HONOR, HENRY O. FAIRBANKS, MAYOR OF QUINCY :

Instruction to inspectors by the State Board of Commissioners :

TUBERCULOSIS.

1.—All herds within your district that are engaged in the production of milk that is to be marketed or sold, including milk or cream, sold to creameries, or in which there are animals that are being fattened for beef, shall be thoroughly examined by you as often as once in each three months.

2.—If they are found to be entirely free from disease, the same is to be certified by you upon a blank which will be furnished from this office, which blank shall be given to the owner of the herd, to be used by him for his own advantage. You will also send the required certificate to this office, and keep your own memorandum of the date and result of the inspection.

3.—If, on the contrary, tuberculosis is found to exist in the herd, each animal showing it shall be isolated on the farm, or in some other convenient place to be selected by you, and quarantined there, under the authority of the local Board of Health, who shall at once notify the Commissioners. The milk from such isolated animal shall not be sold, and in such instances the certificate of health shall not be given for the herd ; or, if it has been previously given it shall be withdrawn.

4.—Quarantined animals must not be killed except by the permission of the Board of Health imposing such quarantine, and in your presence, as the inspector, or in the presence of an inspector appointed by them, who will at once certify the death to this office.

5.—Whenever you have reason to believe that new and uninspected animals have recently been introduced among a herd, or when from any reason, at any time, you have cause to suppose that disease exists in a herd, an inspection shall be made at once, and the directions already given shall be followed.

INSPECTION OF MEAT.

1.—Report to the Commissioners the locations of all slaughter houses within your district, give the name of the butcher, the class of animals killed, the days of slaughter and where the general market is sought.

2.—As to the periodical inspection of these slaughter houses, and the destruction of any meat that may be considered unfit for human consumption, direction and action is to be taken from your local Board of Health.

3.—When, however, tuberculosis is found to exist in a carcass, great endeavor is to be used to find the herd from whence the animal came, if the beef is of local production or otherwise, the town or State from whence it was procured, and a report as to the facts made to the Commission.

GENERAL SUGGESTIONS.

1.—If for any reason you desire to know the name and the address of the inspector for any town within this Commonwealth from which animals may have been removed to your district you can obtain the same by reference to this office.

2.—If during any of your inspections you find any cause of what is called variously, actinomycosis, big jaw, wen, jaw ail, bone ail, or sitfast, in cattle, kindly report its location.

3.—Notify this Board of your action promptly.

4.—Notify this office of the number of blank certificates that you will possibly require.

PUBLIC STATUTES.

SECTION 1. The mayor and aldermen of cities and the selectmen of towns shall annually appoint one or more persons to be inspectors of provisions and of animals intended for slaughter. Such inspectors shall be sworn faithfully to discharge the duties of the office, and shall receive such compensation as the city council or selectmen shall determine.

SEC. 2. Said inspectors may inspect all animals intended for slaughter, and all meats, fish, vegetables, produce, fruits, and provisions of all kinds, found in said cities or towns, or exposed for sale or kept with intent to sell therein; and may for this purpose enter into all buildings or enclosures where said animals, meats, fish, vegetables, produce, fruits or provisions are kept, stored, or exposed for slaughter or sale.

When such animals, meat, fish, vegetables, products, fruit or provisions are found on such inspections to be tainted, diseased, corrupted, decayed, or unwholesome from any cause, said inspector shall seize the same, and cause them or it to be destroyed or disposed of otherwise than for food; but if, at the time of the seizure, the owner of the property seized notifies in writing the inspector seizing the same of his desire to appeal to the Board of Health, said inspector shall cause said animals, meat, fish, vegetables, produce, fruit or provisions to be inspected by said Board of Health, or by a committee thereof, consisting of not less than two members; and if said board or committee find the same to be tainted, diseased, corrupted, or unwholesome, they shall order the same to be destroyed or disposed of otherwise than for food. If said board or committee do not so find, they shall order said animals, meat, fish, vegetables, produce, fruit, or provisions to be forthwith returned to the owner thereof. All monies received by said inspectors or Board of Health for property disposed of as aforesaid, shall, after deducting all expenses incurred by reason of such seizure, to be paid to the owner of such property.

SEC. 3. Said inspectors may inspect all veal found in said cities or towns, or offered or exposed for sale or kept with intent to sell therein, and if said veal is, in the judgment of the inspector, that of a calf killed under four weeks old, he shall seize the

same and cause it to be destroyed or disposed of as provided in the preceding section, subject, however, to the provision therein contained concerning appellant the disposal of moneys.

I find in Quincy 728 cows, besides oxen, bulls and young cattle. With three exceptions, which were taken care of immediately, they are in a good and healthy condition, and think it perfectly safe to use the meat or milk from them; but almost every week animals come to this city from other places and are liable to bring disease at any time and need attention.

I would advise buyers to purchase only healthy animals and be especially careful about cattle with a cough, for such animals may have tuberculosis.

Meats and provisions.—I find the provision stores with few exceptions well kept, some of them in excellent condition, and deserve great credit for the neatness and good quality of meats and other things kept by them.

Respectfully submitted,

JAMES M. CUTTING,

Inspector of Animals and Provisions.

WATER DEPARTMENT.

HON. H. O. FAIRBANKS, MAYOR.

DEAR SIR—The Board of Water Commissioners of the City of Quincy respectfully submit the following, their first report, for the term ending December 31st, 1892.

On June 1st, 1892 the city came into possession of the plant of the Quincy Water Company. The undersigned Water Commissioners duly appointed, held their first meeting on June 22, 1892. H. T. Whitman was chosen chairman and James H. Stetson, secretary. The regular weekly meetings of the Board are held at the office of the Commissioners, in Durgin & Merrill's Block on Thursday evenings.

The fact that the price which the City of Quincy is to pay, has not yet been determined by the courts (the case still pending) prevents the Board from furnishing at this time a statement of the cost of the plant, a general description of which is as follows :

The supply is chiefly taken from the storage basin which is located in the valley of Town Brook in the town of Braintree. The amount of land owned, including area flowed is about 64½ acres.

The surface area of this basin is about 47 acres, the total capacity when full is about 180,000,000 gallons. When the water is at the height of the overflow it is 46 $\frac{1}{10}$ feet above the pumps at the pumping station. The area of the water shed tributary to this basin is estimated at 990 acres. The water is carried from the basin to the pumping station through a 12-inch cast iron pipe about 6,400 feet in length. An additional source of supply is furnished by the two wells located near the pump-

ing station. Well No. 1 is on land owned by the city; this well is 35 feet in diameter and 27 feet deep below the grade of the lot. Two 16-inch suction pipes connect the pumps with this well, so arranged as to draft independently of each other.

The number of gallons of water pumped from this well covering a period from December 17, 1891 to January 2, 1892, inclusive, was 1,799,457 gallons, or about 105,850 per day.

Well No. 2 on land leased from the Adams Real Estate Trust is located in the meadow west of Town Brook and about 320 feet distant from Well No. 1. This well is 35 feet in diameter and 22 feet deep below the surface of the meadow. A 12-inch suction pipe connects this well with the suction pipes in well No. 1 so arranged that either pump will draft from this well. This well is not used at present, the quality of the water not being satisfactory.

PUMPING STATION.

The area of the land is $6\frac{37}{100}$ acres situated at the southerly end of Penn street in Ward 3. The rear building is 42x82 ft. constructed of brick and covered with a flat roof. The boiler and engine rooms are 14 ft. high, floors in boiler room of brick and in engine room hard pine. The chimney is 50 ft. high. The front, main building, is constructed of brick 30x57 ft., including projection two stories in height, slate roof, and contains one office room, shop and a tenement in the second story. The tenement is fitted up with all the modern conveniences and heated by steam. There is a cellar under a portion of the front building. The boiler room contains four steel boilers, 54 inches in diameter. The engines are two in number, the capacity of the pumps is about 2,000,000 gallons each in 24 hours.

The mode of supply is by pumping through the mains to the stand pipe which serves as a storage tank and regulates the pressure on the distribution pipes. This standpipe is located on Penn's Hill, in Ward 3, land 30,000 sq. ft. The elevation of the base of the standpipe is 188.65 ft. above city base. The standpipe is 35 ft. in diameter and 60 ft. high; the capacity when full is about 411,302 gallons. Stairs extend from the ground to the top.

DISTRIBUTION SYSTEM.

The total amount of main pipe laid including conduit pipe from reservoir to pumping station, at the time the city came in possession of the plant was about 35 miles, the number of hydrants, 121; number of service pipes, 1456. The pipes laid by the Quinoy Water Company are principally wrought iron, manufactured by the National Tube Works Co. The hydrants and gates are of the pattern made by the Chapman Valve Manufacturing Company. Cast iron pipes have been used for all recent extensions of mains.

Our seeming delay in extending the mains was criticised by some of the citizens who were anxious to take the water, but it was impossible for the Board to proceed with the work of pipe laying before the City Council had placed at our disposal the necessary funds. On Oct. 10, the City Council passed the order authorizing the Board to expend for the purposes of construction, so much of the income received from sale of water as was necessary to begin the work; the amount expended to be charged to the water loan when the bonds previously authorized by the Council should become negotiable, viz. Dec. 1st, 1892.

Our invitations for proposals to furnish pipe, gates, hydrants and the special castings required for the proposed extensions were promptly responded to by the numerous manufacturers in that line. The lowest bid received for furnishing pipe was made by Warren Foundry & Machine Company, of Phillipsburg, N. J., and the contract was awarded to that company. That for hydrants and gates to Chapman Valve Manufacturing Co., Indian Orchard, Mass.

The special castings were furnished by Warren Foundry & Machine Company and Builders Iron Foundry, Providence, R. I.

The contract for laying pipe, and setting hydrants was awarded to Mr. John Cashman of this city, he being the lowest bidder.

The contract for teaming pipe was awarded to the lowest bidder, Mr. W. F. Loud.

The work of laying pipe was begun Oct. 13th. From the first the laying of the pipe has progressed steadily and as rapidly

as the nature of the work would permit. The large amount of rock found in some of the trenches in Wards 3 and 4 caused considerable delay in those sections and added materially to the cost of doing the work. The last work was done at some disadvantage owing to the frost and to the fact that the necessary hydrants were not received until December 12th.

There still remains to be laid a short piece of the 16 inch main near the corner of Centre street and Brooks avenue, also pipe on Willard street from a point near the railroad station to Crescent street.

After careful consideration of the subject of the future extension of mains in this section the Board concluded that the size of the pipe on this portion of Willard street should be increased to 12 inch. The 8 inch pipe purchased for this portion of Willard street has been carted to Quincy Neck where it can be used to good advantage.

On Standish avenue in Ward 5 about 1500 feet of pipe remains to be laid, the frost preventing the completion of the work.

There are also 26 hydrants yet on hand to be set in the spring.

The hydrants have been located with a careful consideration as to efficiency and when on side lines have been placed as near the mains as possible. Cast iron pipe has been used for all extensions and the character of the work is first-class in all its respects.

Since assuming control of the works 3.19 miles of pipe have been laid, 14 hydrants set, and 158 service connections made, making the total mileage of main pipe 38.19. Total number of hydrants 135. Total number of service connections 1,614, of which 67 are supplied by meter. The size and length in feet and the pipe laid, including 6,400 feet of 12-inch pipe leading from the storage basin to the Pumping Station, is as follows :

				LAID PREVIOUS TO JUNE 1, 1892.	LAID BY WATER COMMISSIONERS.
20-inch pipe	.	.	.	2,679 feet.	
16 "	"	"	.	5,582 "	956.7 feet.

DIAGRAM SHOWING THE LEVEL OF WATER IN STORAGE BASIN FROM JULY 1ST TO DEC. 31ST, 1892.

The daily average consumption of water, in gallons, from June 1st, 1892, to January 1st, 1893, is given by months in the following table :

MONTH.	GALLONS.
June	654,445.
July	837,704.
August	750,259.
September	583,735.
October	583,624.
November	584,955.
December	593,308.

The matter of future extensions, as well as the efficiency of the present fire service, has been the subject of careful investigation and study by the Board. In this, as well as on the work of construction, the varied experience and engineering ability of our superintendent, Mr. F. E. Hall, has proved of great value. Numerous petitions have been received for extensions of mains.

There is a general demand from our citizens for extensions, particularly in the more newly settled portions of the city. The original mains laid by the Water Company were principally through our main thoroughfares and in the section, at that time, most thickly settled. Within the past few years there has been a large increase in the number of houses built in the suburbs of the city and it is evident that the future increase of population will be principally in those sections. To provide a satisfactory fire service and to provide for future extensions in these outlying sections will necessitate the laying of some leading mains and an appropriation will be required for that purpose. The advantages of having constantly at hand an ample supply of water to meet any emergency without interfering with the regularity of the working of the pumping machinery are unquestionable.

The Board is of the opinion that in case of accident in order to provide a sufficient reserve for sudden demand, such as a

large fire, and at the same time to provide an adequate supply for domestic purposes, it is desirable to have at hand at least 24 hours' supply. This result can be obtained by building an additional stand pipe on the City land on Forbes Hill, in Ward 5. The location as well as the elevation of this hill is very favorable for the purpose. The height of the hill is practically the same as the lot of the present stand pipe on Penn's Hill. Not only would this stand pipe serve as an additional storage tank, but it would be of great advantage to the distributing system. The leading main from the Pumping Station to the proposed stand pipe would be an extension of the present 16-inch main on Centre street, through Copeland to Willard street to the West Quincy depot, thence through Willard street and Robertson street to Adams street, thence to the top of Forbes Hill. There is a possibility of water takers nearly the whole distance. The details and estimated cost of this proposed addition to the system will be the subject of a special communication from the Board.

The efficiency of the distribution service can be greatly improved by connecting many of the dead ends now existing in the various sections. Particular attention is called to the lack of fire hydrants in the various sections now piped. Throwing out the 5 miles of 2 inch pipe laid as supply mains, as being too small to furnish a fire service, we have left of the original mains laid when the city came into possession, about 30 miles of pipe. On these lines are located 121 hydrants, on an average of 4 to the mile, averaging one hydrant to about 1300 feet of pipe.

The Board are of the opinion that the City Council should carefully consider the subject of additional hydrants.

The supply of water as at present developed is ample for the present number of takers. It is evident, however, that it is only a question of time when it will be necessary to increase the same. This subject will require careful investigation and studies of competent experts.

RECEIPTS AND EXPENDITURES

FOR SEVEN MONTHS ENDING DECEMBER 31, 1892.

Received from water rates. . . .	\$12,250 65	
Service	1,821 38

Respectfully submitted,

H. T. WHITMAN,
J. T. CAVANAGH,
JAMES H. STETSON,
Water Commissioners.

Quincy, Jan. 1, 1893.

LAW DEPARTMENT.

TO THE HONORABLE HENRY O. FAIRBANKS, MAYOR OF QUINCY :

SIR :—On January 1, 1892, there were pending in the Superior Court for Norfolk County, nine cases against the City. During the past year, of these cases, the following have been disposed of either by trial or agreement between the parties :

Isaac Shute,	vs.	City	of	Quincy.
Charlotte Shute,	"	"	"	"
John Keating, adm'r	"	"	"	"
Patrick Brenan,	"	"	"	"
Emma Castiglioni,	"	"	"	"
Thomas Devine,	"	"	"	"
Michael McGovern,	"	"	"	"
Horace O. Souther,	"	"	"	"

The remaining case, Charles Loring, adm'r. vs. the City of Quincy is still pending in said Court.

The following actions were commenced against the City in the Superior Court during the past year, viz :

Patrick J. Barry,	vs.	City	of	Quincy.
Charles E. Stratton,	"	"	"	"
Thomas D. Pierce,	"	"	"	"

The case of Patrick J. Barry vs. City of Quincy, was settled by a payment to said Barry of the sum of twenty-five dollars. The action was brought to recover for damages on account of personal injuries alleged to have been sustained on Phipps street in said city.

The case of Charles E. Stratton vs. City of Quincy, was brought to recover for damages Mr. Stratton alleged he sustained last spring in consequence of the culvert under Hancock street,

in Atlantic being blocked up, while the same was being repaired, thereby causing the water which usually passed through said culvert to flow back on to his land.

Thomas D. Pierce vs. City of Quincy, is an action brought to recover damages for personal injuries alleged to have been sustained while he was walking on the northerly sidewalk on Foster street, on the morning of February 8th, 1892, by reason of the alleged defective condition of said sidewalk, caused by an alleged rough and hobbly accumulation of snow and ice being allowed to remain thereon.

On January 1st, 1892, the following actions were pending in the Supreme Judicial Court, viz :

Peter Cuniff vs. Commissioner Ewell and the City.

Charles E. Stratton et al. vs. the Board of Health.

These two actions are still unsettled.

The petition of the City to the County Commissioners for Norfolk County, praying for the widening of "Atlantic Bridge," over Hancock street, and "its approaches" is still pending before said Commissioners.

A number of claims against the City for damages were settled without suits being brought thereon.

On January 28th, 1892, the Quincy Water Company filed two petitions at the State House for the consideration of the Legislature, viz :

One for permission to issue 2,500 shares of capital stock par value \$100 each.

The other for the right to take additional land near its reservoir and on the brook feeding the same.

Pursuant to a vote of the City Council, with the proper city officials, I appeared in opposition to the granting of said petitions before the committee of the Legislature having the same in charge. While the petition was being considered by said committee the city voted to purchase the works and rights of said company, and the petitioners were subsequently given leave to withdraw.

In accordance with a vote of the City Council I drafted an act authorizing the Mayor to appoint a Board of Water Com-

missioners, defining their duties and providing means for the purchase of the water company's property and rights, also for the care of the water plant. I attended the hearings of the Legislative committee to which the petition praying for such an act was referred.

The act was allowed by the Legislature as Chap. 373 of the Acts of 1892.

In July last the city petitioned the Supreme Judicial Court to appoint three Commissioners to determine the amount of money the city should pay to the Quincy Water Company for the water works and the rights and franchise of said company.

Mr. Justice Lathrop of that Court appointed the following gentlemen to serve as said Commissioners, viz :

Hons. E. H. Bennett, John Lowell and Charles Clifford.

The first hearing will be held February 20th, 1893.

I have rendered written opinions on all questions and matters submitted in writing to me by the City Council and the heads of the different departments of the City Government and have orally advised and otherwise assisted said officials in relation to such other matters as they desired.

Respectfully submitted.

JOHN W. McANARNEY,

City Solicitor.

ENFORCEMENT OF LIQUOR LAWS.

TO HIS HONOR THE MAYOR OF THE CITY OF QUINCY:

I hereby submit the first report of the Liquor Officer for the seven months and sixteen days ending December 31, 1892, being the time from my appointment to office, May 15 to December 31, 1892. During that time I have used my best efforts to suppress the liquor traffic in this city, and I think I can safely say that today there is not a city or town equal or nearly equal in size in this Commonwealth where less liquor is sold than in this city. But I believe that the ever watchful eye should be upon it and that the work should still go on and liberal appropriations should be made for the suppression of the traffic for the ensuing year.

Although at present it may seem to those that are unacquainted with the "ways that are dark and the tricks that are vain" to be unnecessary, it only wants the eyes of justice to be taken away when the illegal business would spring into existence, and the cost to suppress it would be far greater than a liberal expenditure to keep it under subjection. In closing, I most sincerely tender my thanks to the police officers of the city, who have so ably assisted me in my work and who have ever been ready and willing whenever and wherever called or needed, and all others who have assisted me will please accept my thanks.

Respectfully,

DANIEL McGRATH,

Liquor Officer.

REPORT.

In the time from my appointment, May 15, 1892, to Dec. 31, 1892, I have investigated and reported to you thirty-one (31) cases.

I have also made seizures of liquors, by authority of the court, by search warrants, and have found and taken the following liquors to wit: 70 gallons of ale, 18 gallons of beer, 6 gallons of rum, $1\frac{3}{4}$ gallons of wine, and $\frac{1}{2}$ gallon of whiskey, which with the vessels containing them, and the implements used have been forfeited to the Commonwealth, and I have delivered to the proper authorities vouchers received for the same.

I have also made or caused to be made complaints against persons for other violations of the liquor laws, and warrants have been issued and served in most cases, with the following results:

Complaints made to search for liquors	5
Warrants issued to search for liquor	5
Search warrants used	5
Liquors found and seized	5
Cases returned to court for prosecution	5
Cases heard in court, seizures	5
Claimants appearing	1
No claimants	4
Cases where liquors forfeited to Commonwealth	5
Orders issued to deliver liquors to Commonwealth	5
Liquors delivered to Commonwealth and vouchers taken	5
Complaints made for other violations of liquor laws	13
Warrants issued for other violations of liquor laws	13
Warrants served " " " "	9
Warrants not served " " " "	4
Number convictions " " " "	6
" acquittals, &c. " " " "	2
" defaulted	1

The amount of money paid into court for fines has been in liquor cases \$395.00, which after deducting the expenses of the officers has been turned over to the Treasurer of the City. In

closing my report, I may say that in the warrants not served that the defendants in each case are, and have been unable to be found, although diligent search has been made.

Respectfully submitted.

DANIEL McGRATH,

Liquor Officer.

Quincy, December 31, 1892.

ADAMS ACADEMY.

The Managers of the Academy feel that the trust committed to them is yearly becoming a more difficult problem.

It is probably known only to a few how largely the Academy has been carried on for fifteen years by the generosity of the Master, Dr. Everett.

The boarding house feature through all these years has not been self-supporting, and has required a considerable sum from Dr. Everett annually to make up the deficiency.

The income from the Endowment Fund of the Academy itself, though larger than in years past, is still far from being sufficient to meet the wants of the Academy.

The receipts from the fund for the	
year ending April 1st, 1892, were	\$2,541 35
The payments were	
For janitor	\$395 78
For coal	269 07
For labor on Academy building .	26 50
Paid Dr. Everett	1,850 00
	<hr/>
	\$2,541 35

From this it is seen that but \$1,850, were received to be applied to the instruction of the pupils during the year ending June 1892.

In addition to this there were

Received from non-resident pupils	\$1,400 00
From eight Quincy pupils, whose rank entitled them to scholarships, but whose parents preferred to pay, that other boys less favorably conditioned financially might obtain their tuition free	600 00
One pupil entitled to a scholarship, paid one-third of his tuition	25 00
From two Quincy pupils whose rank did not entitle them to scholarships	150 00
Total	<u>\$2,175 00</u>
Making the total of all receipts	\$4,025 00

There are \$75.00 due from one boy whose rank did not entitle him to a scholarship.

The salary list of teachers for 1892 was \$4,600, together with board of two teachers provided by Dr. Everett.

Dr. Everett for the past fifteen years has given his services for the reason that there has not been money to pay him a salary. Bearing in mind the fact that the income from the fund this past year was considerably larger than in former years and noting what the expenses of the school are, it is evident that Dr. Everett's contributions to the support of the school during the past fifteen years have been generous in the extreme.

It would be almost impossible to find another, able and willing to make such pecuniary sacrifices, and we seriously question if our city ought longer to accept them.

Still, the long perplexing question, What shall be done? forces itself upon the Managers. Suggestions that there should be some union or consolidation of the higher schools of the city have had due consideration but have not been found practicable or possible. The Managers see no possible way of securing means to put the school upon a better financial basis, so that it could hope to compete with other fully equipped schools.

One certain and immediate need of the school is a Physical Laboratory. Requirements of colleges for admission demand such instruction as can be given only with the assistance of such a laboratory, and it is hoped that there may be some citizen who will during the year furnish the necessary five hundred or one thousand dollars for this purpose.

During this past year the school has lost the valuable services of Mr. Campbell, who has been connected with the school for so many years, and with the value of whose services every friend of the school is familiar. It seemed a serious loss to the school, but the slender fund at the disposal of the Master forced him to say that he could not longer guarantee a continuance of the present salary, to say nothing of the well-deserved increase, and Mr. Campbell felt it his duty to accept a position in the Boston Latin School.

The Board feel it wise to recommend that the charge for non-resident day pupils be lowered from \$100 to \$75 per annum, the charge for non-resident pupils who are boarders, to remain as heretofore.

REV. EDWARD NORTON,
CHARLES A. HOWLAND,
GEORGE F. PINKHAM,
LUTHER S. ANDERSON,
JOSIAH QUINCY,
JOHN O. HALL,

Managers of Adams Academy.

Quincy, Jan. 1, 1893.

REPORT OF CITY CLERK.

TO HIS HONOR THE MAYOR OF THE CITY OF QUINCY:

SIR :—I have the honor of submitting herewith the fourth annual report of this office, for the year ending December 31st, 1892, as follows:

RECEIPTS.

For marriage licenses	\$95 50
Circus license	50 00
Various other licenses	109 00
Dog licenses	155 40
Recording mortgages, &c.	150 20
Total	<hr/> \$560 10

The above sums have been paid to the City Treasurer and receipts taken therefor.

Number of marriage intentions recorded	191
Number of marriages recorded	189
Number of deaths	"	318
Number of births	"	612

Number of dogs licensed, 777; males, 725; females, 52; for which the sum of \$1,710.00 was received, and the same less fees for collection has been paid to the County Treasurer.

CHRISTOPHER A. SPEAR,

City Clerk.

SCHOOL DEPARTMENT.

TO THE CITIZENS OF QUINCY :

The School Board submit herewith their report of the past year's work in our schools.

There is little in the way of new ideas that we can add to the great store which has been given you in previous years.

We believe that the schools are in as good a state of progress as ever. That no backward step has been taken.

By the resignation of Mr. George I. Aldrich, from the position of Superintendent, a vacancy was created which was filled by the promotion of Mr. Herbert W. Lull. The choice has proved to be a wise one.

While our new Superintendent had no special training for the position, his thorough knowledge of the art of teaching, acquired by years of experience, with an energy which is contagious and a desire to do all the duty which devolves upon the position, with a wide and broad intelligence it is certain that Mr. Lull's first year with us as Superintendent has been one of great success.

Heretofore, for several years, the towns of Quincy and Milton united and had one Superintendent. This has now been changed and the Superintendent of Schools in Quincy gives his whole time to the schools of our city.

We believe that this is greatly to our advantage.

On September 24, 1892 was dedicated the Lincoln School Building.

Very wisely, following the traditions which have prevailed among the different School Boards, the name of our martyr President—" *The First American* "—was given to this building. The necessity of its being built is demonstrated by the fact that it is full to over-flowing.

The High School building, over forty years old ; is entirely inadequate to meet the requirements of our city. The imperative necessity for a new building is fully known by every citizen. We think that in the new building which should be built at once, rooms for the School Board and office for the Superintendent should be provided.

We are well aware that a large sum of the possible revenue of our city is required for the proper support of our schools. The charge is an ever increasing one. Consider for one moment that our school population increased last year 332. It costs about twenty dollars per annum for each pupil. The natural increase would alone call for increased expenditure of rather more than \$6,000.

Our motto is ever onward and upward. We must not be laggards in the race but always in the van. We feel sure that you desire it. In carrying out your wishes we are your servants, and we are sure that all needful and required sums will be given us to carry on the work of our schools.

The city of Quincy is a training field from which those towns and cities which pay larger salaries to their teachers continually recruit. This is an obvious injury to our schools. We are continually feeling the necessity of revising our salary list. We wish for the best talent in our schools. To obtain it we must pay for it.

The teaching force has been increased during the past year by nine, two of whom were male principals, and two were specialists.

Two new school districts were formed this year and slight changes made in others. Some slight modifications of these lines must be made which will relieve the Lincoln School.

The total valuation of buildings and land is put by the assessors at \$307,110.00, a sum more than equal to the entire indebtedness of our city.

For the details of cost of supporting our schools, reference is made to the report of the Superintendent which is hereto annexed, all of which is respectfully submitted.

School Committee.

REPORT OF THE SUPERINTENDENT.

TO THE SCHOOL COMMITTEE OF QUINCY :

Gentlemen,—In accordance with Rule 13, of the New Rules of the School Board: "The Superintendent at the end of each year shall make a written report to the Board." I therefore present the following, which is my first report; but it is the eighteenth in the series prepared by the Superintendent of Schools, and the forty-third of the printed reports.

In the following pages it will be my desire to give you a plain, business-like statement of the condition of the schools of Quincy, without attempting to discuss any of the great educational principles that underlie them :

I. SCHOOL PROPERTY.

High School: wood, furnaces, 3 rooms, erected in 1852, with land valued at	\$9,000 00
Adams School: wood, furnace and stoves, 10 rooms, erected in 1855, enlarged in 1879, with land valued at	15,000 00
Coddington School: wood, stoves, two buildings of 6 and 3 rooms, erected in 1855, enlarged in 1876, with land valued at	20,000 00
John Hancock School: brick, steam, 8 rooms, third floor unfinished, erected in 1886, with land valued at	45,000 00
Lincoln School: brick, steam; 8 rooms, erected in 1892, with land valued at	28,000 00
Quincy School: wood, furnaces, 8 rooms, erected in 1873, with land valued at	19,700 00
<i>Amount carried forward</i>	<hr/> \$136,700 00

<i>Amount brought forward</i>	\$136,700 00
Washington School: wood, furnaces, 8 rooms, erected in 1858, enlarged in 1874, with land valued at	11,000 00
Willard School: brick, Smead system, 16 rooms, erected in 1891, third floor unused, with land valued at	112,310 00
Wollaston School: wood, Smead and furnace, 9 rooms, erected in 1873, enlarged in 1890, with land valued at	34,000 00
	<hr/>
	\$294,010 00
Furniture, books, apparatus, etc.	12,500 00
	<hr/>
	\$306,510 00
In addition, there are two school lots :	
The Germantown lot is assessed at \$300 }	
The Quincy Neck at \$300 }	600 00
	<hr/>
Total valuation	\$307,110 00

The nine buildings are now seated for 3,826 pupils. There are 3,724 different pupils enrolled.

This schedule shows a gain of one building of eight rooms during the past year. This increase is due to the erection of the new building on Brooks avenue, in Ward Three, for the accommodation of those children living between the two lines of the Old Colony Railroad and south of Water, Copeland and Station streets. The long discussion regarding the need of such a building delayed work so long that the house was not ready for occupancy until the third week of the fall term. The eight rooms are unusually well adapted for forty-two pupils each, and can, without encroaching too much on the floor surface or the air volume, accommodate forty-eight. By this scale the house will seat 384. For the pleasure of those who insisted that the need of increased accommodation in this part of Ward Three was pressing, it should be stated that the average number belonging since September is 433. In addition, in April there will

be a large entering class of those who have become five years old since last September. It is a self-evident fact now that the middle section of the building should have been carried up another story to allow the separation of the A and B Grammar classes.

Here, too, attention should be called to the future needs of that part of the city lying east of Hancock street and including Wollaston Park and Norfolk Downs. A school lot should be obtained in that section while there is an opportunity to choose land most suitable for a site and to buy it at moderate expense.

II. TEACHERS.

In these nine school buildings there are 3,724 pupils in charge of the following corps of teachers:

	MEN	WOMEN
High School, Principal	1	0
Other Teachers	0	4
Grammar Schools, Principals	7	1
Other Teachers	0	25
Primary Schools, Teachers	0	42
	<hr/> 8	<hr/> 72

SPECIAL TEACHERS.

Director of Drawing	1
“ “ Music	1
“ “ Nature Study	1
“ “ Sewing	1
Lecturer in Cooking	1
	<hr/> 8
*Assistants	14
	<hr/> 8
	91

*When it has been necessary to place more than 50 children under one teacher, the most proficient members of the training class have been made assistants.

This total will show the following increase over last year: 2 male principals, 1 new assistant teacher in the High, 2 Grammar assistant teachers, 2 Primary and 2 specials in sewing and cooking.

The organization of the Lincoln School called for a Principal and the reorganization of the John Hancock demanded another. The unexpected increase at the High caused an overflow and hence the need of extra teaching force.

III. PUPILS.

In the care of these five score teachers are the following children:

Whole number of different pupils registered	3,724
Average number belonging	3,392
Average number attending	3,228
Ratio of attendance to membership	94.9
Pro rata of tardiness to average membership	.53
Cases of truancy	53
Number of visits	5,222

The zeal exhibited by the teachers in their efforts to secure a more perfect attendance is highly commendable. This zeal, combined with their exertions to make the school room attractive and the class work interesting, accounts in a great measure for the results recorded above. In spite of their best and most conscientious efforts, however, there are cases that cannot be reached by going or by sending to the house, or by the intervention of a truant officer. The delinquents often are not so much in fault as are their parents. In cases of truancy, manifestly the sins of such parents are visited on their children.

If the teachers could have the assistance of *one* truant officer, instead of many, without doubt even the present high record of attendance could be raised. A competent man who felt the responsibility of his position, could by his appearance on our streets, render the life of the would-be-truant less secure than at present. In my circuit riding I see many children in private yards and the adjoining streets who seem to be out of school without cause. One truant officer should have a regular

round, should examine into such cases as I have mentioned, should make regular calls to examine labor certificates, should take the school census in May, and should attend to minor repairs and supplies.

See tables in the appendix.

IV. CENSUS.

The 3,724 pupils recorded in the third section represent a population estimated by some at 20,000; by others more conservative at 19,000; by the State Board of Health at 18,669. By the census of 1890 the population was 16,723. The whole number of different pupils is 22 per cent. of 16,723; 19 per cent. 18,669; 18 per cent. of 20,000.

"The School Committee shall annually, in the month of May, ascertain or cause to be ascertained the names and ages of all persons between the ages of five and fifteen years belonging to their respective cities and towns on the first day of May, and shall make a record thereof."—*Pub. Stat., Chap. 46, Sec. 3.*

In accordance with this section E. Emery Fellows made a thorough canvass, and reported 4,377 children. This total represents an increase of 332 over the census of 1891. This gain means a sufficient number to fill six large rooms and to require the services of the same number of teachers. In other words the growth is nearly equivalent to the capacity of a new school building of our regular size. To show that this increase is not a sudden inflation of our population, but a healthy expansion, consult these returns of the past decade:

	1883	1884	1885	1886	1887
South	523	588	520	727	769
Centre	388	432	409	461	461
Point	337	356	308	376	380
West	706	802	693	939	964
Wollaston	213	236	229	242	251
Atlantic	279	320	257	343	328
Total,	2,446	2,734	2,416	3,088	3,153

	1888	1889	1890	1891	1892
South,	840	926	1,024	1,158	1,281
Centre,	480	481	485	522	522
Point,	368	353	325	337	357
West,	1,008	1,108	1,161	1,281	1,407
Wollaston,	278	313	332	365	416
Atlantic,	322	314	338	382	394
	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>
Total,	3,296	3,495	3,665	4,045	4,377

V. MONEY.

Valuation of Quincy, May 1, 1892	\$15,566,920 00
Average valuation for 1890-91-92	\$14,406,695 00
Total tax levy	\$260,745 82

To meet the expenses necessary to maintain such a school system as has been outlined, the City Council made the following appropriations for 1892:

	March.	Sept.	Year.
Salaries	\$48,000	\$1,805	\$49,805
Fuel	3,500	210	3,710
Janitors	4,000	172	4,172
Transportation	850		850
Micellaneous	3,700		3,700
Books and stationery	2,700	400	3,100
Evening Drawing Schools	1,000		1,000
Evening Common Schools	1,200	713	1,913
Sewing for Grammar	500		500
Cooking for High	100		100
	<hr/>	<hr/>	<hr/>
Totals	\$65,550	\$3,300	\$68,850

By section 34, paragraph C, of the City Charter, the Commissioner of Public Works has "cognizance, direction, and control of the construction, alteration, repair and care of public buildings; except that the *care* of all school buildings shall remain under the control of the school committee." Although the committee do not have "cognizance, direction and control of any appropriation for repairs," yet the money paid for the same is stated here, as it is in reality a part of the total cost of the schools for 1892.

Commissioner Ewell reports the following outlay:

High	\$253 12
Adams	357 96
Coddington	102 88
John Hancock	193 34
Lincoln	180 30
Quincy	490 00
Washington	201 04
Willard	427 91
Wollaston	64 12
	<hr/>
	\$2,270 67

The Council has made the following transfers during the year:

From salaries, \$200 to these departments:—Fuel, \$15; janitors, \$10; transportation \$12; miscellaneous, \$50; books and stationery, \$113. Total, \$200.

From Evening Common to the Evening Drawing School, \$35.

From sewing to books and stationery, \$100.

After the accounts of 1891 were closed, bills contracted in that year to the amount of \$678.88 were received. To meet this overlay the Council made a special appropriation. Other bills of 1891, to the amount of \$263.29, were paid from the appropriation of 1892.

The summary of the expenditures for 1892 are as follows:

	EXPENDITURES.	UNEXPENDED BALANCE.
Salaries	\$49,496 89	\$108 11
Fuel	3,720 84	4 16
Janitors	4,178 12	3 88
Transportation	860 75	1 25
Miscellaneous	3,749 86	14
Books and Stationery	3,312 81	19
Evening Drawing School	1,033 04	1 96
Evening Common Schools	1,876 42	1 58
Sewing	399 93	7
Cooking	100 00	
Total	\$68,728 66	\$121 34

For an itemized account of all the departments see the financial statement at the close of this report.

The unexpended balances do not compare favorably with the reports of previous years, but it is hoped that the fact that there will be no overlay from 1892 to 1893 will more than compensate for the smallness of the said balances.

It has been somewhat difficult to state at any given time the exact balance on hand, because so many have taken upon themselves the responsibility of contracting bills in the name of the School Department. It would have been unjust to refuse payment for services performed in good faith, but in every case the creditor was warned not to accept in the future unauthorized orders.

Total expenditure by the School Board	\$68,728 66
“ “ Commissioner Public Works	2,270 67
Grand total	\$70,999 33

Cost per pupil based on total number of different pupils enrolled	\$19 06
Based on average number belonging	20 93
Based on average daily attendance	21 99

VI. ADDITIONAL STATISTICS,

By the Fifty-fifth Annual Report of the Board of Education, Quincy holds the following rank among the 351 towns and cities of the State and the 27 of the County :

Percentage of valuation appropriated to public schools—in the State, 171 ; in the County, 16.

Ratio of average attendance to the whole number of children between 5 and 15 years—in the State, 266 ; in the County, 23.

Comparative amount of money appropriated for each child between 5 and 15 years—in the State, 148 ; in the County, 21.

The second statement will probably cause the most surprise, because our school population seems large. Our total number of different pupils of all ages enrolled during the year is 3,724 ; the census of May gives 4,377 between 5 and 15 years ; a difference of 653.

A part of the loss just referred to may be accounted for by the following table.

Number of pupils on Dec. 22, 1892, in the twelve grades from lowest Primary through to the High School :

Primary,	I.	653,	II.	450,	III.	406,	IV.	393.
Grammar,	V.	361,	VI.	319,	VII.	253,	VIII.	214.
High,	IX.	86,	X.	48,	XI.	30,	XII.	19.

The loss in the middle of the Grammar course is quite marked and is doubtless due to the fact that many have just reached the age of fourteen, when by the laws of the State, they can seek work without being obliged to return to school for a part of the year.

At the dedication of the Cambridge English High School, Dr. A. P. Peabody said : “ Most of the pupils leave the grammar school at too early an age for any employment in which they can have the opportunity of rising. They may, indeed, be put to some kind of handwork, and many of them must be so disposed of on account of the inability of parents to support them any

longer. But those who go to work so young are unlikely ever to attain even the position of skilled laborers. Worse still, children who leave school so young, and at once become hard workers, will scarcely retain enough of the school atmosphere to make them intelligent citizens. Their transient vision of things desirable to know will fade and vanish; and as regards anything beyond their working day sphere they will know less at twenty than at twelve, less at forty than at twenty. This is undoubtedly the destiny of a considerable proportion of the graduates of the grammar schools, who yet will be for their lives long better citizens and better men and women for the schooling that they have had."

The Secretary of the State Board of Education states that about 93 per cent. of the school population of Massachusetts attend no schools higher than the grammar.

It has been suggested by some of the School Board that a nine years' course would hold many in the Grammar schools who do not now begin a new course at the High, but who would be willing to continue another year for the sake of a full Grammar diploma and for the additional subjects—book-keeping, civics and English history—that could then be offered. The decided falling off from 214 in the highest Grammar to 86 of the lowest class in the High, would seem to warrant such a change. The average age of the 214 pupils of the highest Grammar is 14 years and $\frac{1}{2}$ month. There are 19 who are 12 years old; 70, 13 years; 73, 14 years; 38, 15 years; 10, 16 years; and 4, 17 years. These data, combined with the fact that the average age of those who entered the lowest Primary grade in September was 5 years and 3.9 months, would indicate that another year added to the course below the High school would not be an excessive demand. With a nine years' course promotions could be more easily made, and therefore the average age of the graduates would not be increased by a whole year.

The cities and large towns of New England report generally a nine years' course. The average age of 1,950 graduates of such a course, as returned last June, was 15 years, 2 months; and 28 per cent. of these pupils finished the course in less than nine years.

VII. SALARIES.

The teacher is expected to train and develop the mind of the child ; to teach him to think, to see, and to express himself ; to aid his physical development by proper exercise and position ; to help him to grow in moral strength by ever emphasizing right motives and right acts, and by judiciously repressing in him all evil tendencies, to lift the child to a level of greater refinement, a higher civilization and broader conception of what life is and its limitless possibilities. Incidentally a fair knowledge of the curriculum of our most advanced common schools may be mentioned ; but over all and above all, is character building, a building that many a home does not give, and a building that means the development of that citizen on whom rests the perpetuity of this government.

Since we demand all this, viz : a trained mind, a certain amount of knowledge, a good character, as well as a respectable appearance, neatness of dress and refinement of manners—in fine, everything that makes up such a personality as we would have children at their most susceptible age imitate—let us see what we pay for what we expect to have.

The average salary per annum now paid to the 67 regular Grammar and Primary teachers, excluding Principals, is \$449.62. This amount divided by 300 gives \$1.50 per day. Some may object to the divisor. Unfortunately teachers cannot during vacations fall into a comatose state that requires neither food, shelter, nor clothing. The Commissioner of Public Works pays \$1.75 and \$2 per day. Of these 67 teachers just mentioned, 8 receive \$400 ; 19, \$425 ; 20, \$450 ; 6, \$475 ; 14, \$500.

It is evident that only the weakest teachers are really *paid* for their work: The great majority are giving the freshness of young womanhood, the best of their mental strength, and of their nervous force, in fact, the best years of their life for a comparatively insignificant pecuniary reward.

These lamentations will be found in your school reports for decades, and you have been long accustomed to this minor key. I ought not to fail, however, to record the fact that the present Board has sought to prevent the excessive

drain upon our corps of teachers, due to the tempting salaries offered by our ambitious and wealthier neighbors. Many of our tried and successful teachers received this year an increase that their services well merited. Much remains to be done, as the statistics above have shown.

The appendix shows the years of service.

VIII. HIGH SCHOOL.

Because of its seclusion only a minority of our citizens have personal knowledge of the High School building or the needs of the school. Just forty years ago the house was opened. No doubt its proportions were ample for those days, but the building has been out of date for twenty years. In fact, ever since the school has numbered one hundred members the accommodations have been insufficient. The visitor will look in vain for physical or chemical laboratories, for drawing rooms, for store closets, for teachers' rooms or principal's office, for a basement, or even a common cloak-room for the young ladies—to say nothing of similar accommodations for the young men. As for ventilation, it is unknown.

In such a building 183 (Dec. 22) pupils would be pleased to find at least suitable places to sit. To relieve the pressure in a slight degree, a new teacher was engaged, and 33, the English portion of the class of '96, were transferred to the attic room of the Adams. This is the same room that was used as an argument for the erection of the Lincoln, on the ground that the room was not fit for a large class.

Every Thursday, rain or shine, nearly a hundred must go from the High School to Hardwick Hall for the drawing lesson and at the end of ninety minutes, return to the school. This hall is used also by the Evening Drawing School. For this room the Board pays \$180 per year, in addition to the cost of extra janitor's work and extra heating. This department also pays \$224 for rent and care of the two rooms in Durgin & Merrill's block, and even then the Board holds its meetings in the City Hall. A new building for the High School should house the Evening Drawing School, the School Board, and the Superinten-

dent of Schools. The plan would cause a saving of \$400 per year. Still further, the Adams and the Coddington must soon have relief in their Primary grades. The former now averages 44 in each room and the latter 47. The old High School building at a moderate cost for alteration will make four excellent Primary rooms.

In the average number belonging this year, there is an increase of 28 per cent. over that of last, and the growth will be as marked next year, if accommodations can be provided and the course of study enlarged as it should be, to compare favorably with the schools of the surrounding towns. Our present course is only a provisional one, but the response to increased advantages is quite pronounced. The course is fairly elective, but it should be more so. The value of a study does not depend on the difficulty or the repugnance overcome in pursuing it. "If the opposite were true, and such a theory were carried to its logical limit, we should select the color blind for an artistic education, and those with no ear for a musical one. The elective theory maintains that there is enough inevitable hardship." Therefore, I hold that the only required study should be English and this four hours per week during the whole course. As a people we are woefully ignorant of our own tongue and of our own literature.

In addition to the usual mathematics, reviews, history and language, the High School should afford a better education for those who intend to seek employment in the business houses of Boston. I refer to the practical utility, convenience and economy of time resulting from phonography and to the ability to use the omni-present type-writer, an invention that teaches neatness, care, accuracy, close observation, and accents all the laws of good composition. Five cities have already adopted these two subjects in their public schools. Double entry book-keeping should be studied with greater facilities for illustrating business methods.

A two years' business course containing such an addition, together with the broad principles of commercial law and of commercial arithmetic, would cause as great an increase in the coming year as we have witnessed in the past twelve months.

One-half (86) of the grammar graduates of last June are now in the High. If the same proportion holds good next year, there will be more than a hundred in the class of '97; but if this enrichment is granted, it will add a score to the hundred.

As last year the course was changed from three to four years, there was no public graduation in June. The twenty-two pupils who had completed the three years' course were given the usual diplomas and then urged to return. Eighteen did so (one entered from another place, making nineteen in all) and in June '93 we may feel that the four years' course is fairly established.

It may be of interest to know that the six Wards are represented as follows:

I. 21, II. 28, III. 47, IV. 31, V. 24, VI. 32.

Ward VI., in proportion to its census of May, is the banner Ward and yet its children live farthest from the school.

During the last term three series of prizes have been offered the pupils of this school. First for declamation, prizes to the value of \$75 may be selected from the catalogue of Houghton, Mifflin & Co.; second, prizes for essays to the amount of \$21 from the same catalogue; third, prizes for translations from French and Latin, to the amount of \$21, on the same conditions as before. It is pleasant to record the fact that we have two citizens who are so devoted to the interests of our schools, and who are so willing to give their time, experience and money as are the donors of these prizes.

See appendix for essay subjects and a list of the graduates of the school.

IX. JOHN HANCOCK SCHOOL.

Until July of the present year the John Hancock has been organized as a Primary school; although, on account of the crowded condition of the neighboring schools, a low grammar room was opened under the direction of the principal. The erection of the Lincoln made it possible to reorganize the John Hancock as a full grade (eight) school. The whole number belonging to December 22 is 306.

The natural bound on the south is the electric-car track, and the limit was so fixed in anticipation of this reorganization; but the growth of the southern part of Ward Three has been so extreme that the bound must be pushed further to the south. This will increase the attendance, so that the enrollment will be about 350 until April.

X. LINCOLN SCHOOL.

On Saturday, September 24, at 3.30 o'clock P. M., this school was dedicated by the following exercises, under the direction of the Committee on Dedication,—Henry O. Fairbanks, Mayor; Emery L. Crane, Chairman of School Board; H. W. Lull, Superintendent of Schools; William A. Reed, Principal Lincoln School:

Chorus	High School Pupils
Invocation	Rev. Edward Norton
Announcement of Completion of Building,	
	The Contractor, James McNeil
Delivery of the Building to the Mayor of the City	
By the Commissioner of Public Works, W. W. Ewell	
Response	By His Honor the Mayor, Henry O. Fairbanks
Acceptance, By Chairman of School Committee, Emery L. Crane	
Reception of Keys, By Principal of School, William A. Reed	
Presentation of the United States Flag	By the Mayor
Chorus	By Audience
Short Addresses, By Theophilus King and Edwin W. Marsh	
Chorus	High School Pupils

The dedication of this addition to Quincy school property as the Lincoln School reminds our citizens that they have reason to take pride in the names of their school buildings. Adams, Coddington, John Hancock, Quincy, Willard and Wollaston are local names and so well known that any explanation of their selection, or any defence would be ridiculous. As we had in the past dedicated a school to Washington the Father, surely we could not do better than name our newest structure for Lincoln

the Emancipator. Our High School lacks a distinctive appellation, but in the near future it is to be hoped that a new house will perpetuate the renown of some equally distinguished American.

The Lincoln has been organized as a full grade (eight) school under a male principal. The large attendance in the lowest grades more than fills the rooms allotted and therefore the A and B Grammar classes, numbering at present 45, are limited to one room. Next September these classes will number 60 to 70 and other accommodation must be provided.

XI. EVENING DRAWING SCHOOL.

The instructor reports that the arrangement of the course is now more practical for the citizens of Quincy, as he has visited the stone yards and has also interviewed those who have previously attended the school. From this inspection and from the interviews, he has been able to adapt the course to the needs of this city. There are two classes in mechanical drawing and two in freehand. Average attendance was: mechanical—first year, 19.1; second year, 34. Freehand—first year, 9.6; second year, 2.4.

Last April 14 certificates were issued to the first-year class of the mechanical, and 4 diplomas to the second-year; 8 certificates to the first-year freehand, and 3 diplomas to the second year. The instructor complains of the irregularity of attendance, and recommends that the Committee adopt the plan of other places, viz.: require a deposit of one dollar and a written agreement to attend regularly unless prevented by sickness or removal from the city. More than five absences from the fifty regular lessons forfeit the dollar to the use of the school. Such a plan will keep away those who come from curiosity, or who have no settled purpose, will not exclude the deserving, and will give those who wish to improve their time better instruction.

I desire to call the attention of our regular teachers (women as well as men) who have any taste for this subject, to the fact that they are welcomed as students. Several are now enrolled.

XII. EVENING COMMON SCHOOLS.

This year the Evening Schools have been held in the Adams and in the Willard buildings, with this attendance :

Adams : Largest attendance of men, 83; of women, 9; of both, 88. Smallest attendance of men, 19; of women, 1; of both, 23. Average attendance of men, 59.4; of women, 5; of both, 50.9.

Willard : Largest attendance of men, 130; of women, 23; of both, 140. Smallest attendance of men, 27; of women, 1; of both, 30. Average attendance of men, 87.7; of women, 10; of both, 97.7.

The Adams has had 41 sessions, and the Willard 57. The larger number at the Willard is due to the fact that the Willard did not open in the fall of '91 at the time the Adams began, but held its first session January 4, '92, and therefore continued until March 25. Both schools opened for the fall term October 31. Sessions are held Mondays, Wednesdays and Fridays. The teachers are the regular day-school teachers who request the privilege of extra work.

The Principals complain of the same trouble as does the Instructor of the Evening Drawing school. Many begin, but there is a gradual falling off. The city of Fitchburg has suffered from this cause, and I copy from the last report the Superintendent's experience :

"The work of these schools is hindered by the presence at the beginning of each term of a number of pupils that enroll themselves with no intention of remaining. This year the plan was adopted of requiring the applicant to make a deposit of one dollar as a guarantee of an intention to attend. This deposit fee is returned at the end of the term. This method has the effect of deterring from registration many who would enter the school with no intention of applying themselves to study. The character of schools this season is unlike the previous years. Had there been any doubt concerning the advisability of adopting this plan of registration, that doubt would be dispelled upon the opening of a school. The improved condition of affairs speaks for itself."

I should recommend that a diploma be given for a certain amount of work in a given number of subjects, and a certificate at the end of each year for regularity of attendance. If some general exercise could be held at the end of the year, it might raise the school in the public estimation so that more of our grammar school graduates would not put away their books forever at the age of fifteen years. In fine, the grade of work should now be raised to correspond with that done in the lower classes of the High school.

XIII. READING.

Much of the new reading matter furnished during the year has been selected with reference to its literary value. It is hoped that it shall not be true of Quincy that "nine-tenths of American Grammar School pupils pass out into life with no special taste for, or knowledge of, good literature or history." Our children are reading understandingly, not selections, but whole stories, poems, and essays, of Longfellow, Whittier, Holmes, Bryant, Lowell, Hawthorne, Burroughs and other writers of real merit. In addition, there are a graded series of Historical Readers, containing stories, legends and folk lore; of Information Readers, describing our food, clothing, industries and kindred subjects; and a partial line of Nature Readers. These furnish excellent material for the reading classes and at the same time broaden the child's view of life by nourishing his mind and by arousing and strengthening his dormant moral powers. Such reading matter increases his knowledge of the English language, and if the leading thoughts are reproduced in written work, it will greatly enlarge his power of expression. A teacher whose "hobby" is language is a real need, and in this standard literature will be found a source of inspiration and of helpful material for such work.

Aside from the regular reading of the school room an effort has been made for several years to encourage it at home. To the pupils of the High School the following questions were submitted in December, and from 180, these answers were received.

1. How many books of any profit to you have you read since January, 1892? 4 had read 1; 15, 2; 11, 3; 13, 4; 21, 5; 16, 6; 4, 7; 9, 8; 6, 9; 26, 10; 2, 11; 6, 12; 1, 14; 9, 15; 3, 20; 1, 24; 4, 25; 1, 28; 1, 30. A total of 1,219 books, or 6.7 each.

2. Are you a regular reader of any standard magazine or other periodical publication? 137 are.

3. Are you a regular reader of a daily newspaper? 128 are.

4. Do you regularly take books from the Thomas Crane Public Library? 127 do.

5. Are you the owner of ten or more books that will be of any value to you after leaving school? 107 are.

It should be remembered that the free text-book system tends to discourage ownership. One pupil accounted for her wide reading by the fact that her father gave her a prize provided that she furnished him with a review of the book read. "Would that there were many fathers like this one!"

The annual report of the Thomas Crane Library will show an increase in reading by the pupils. This brief investigation will explain a part of the increase. These returns and the additional fact that more than 450 pupils of the lower grades are also patrons of the Crane Library are most gratifying signs of growth.

The same annual report will also reveal a decrease in the reading of educational works. If any responsibility for this rests on the teachers, let me say that 75 per cent. are owners of such works. Furthermore, 87 per cent. are regular readers of one or more standard educational magazines or journals.

In connection with reading, mention should be made of the vote of the Board to furnish every room with one copy of "Our Dumb Animals," the publication of the American Humane Educational Society. Each teacher is expected to impress on the minds of the pupils the lessons of mercy taught by this paper.

XIV. NATURE.

“Men read in books what authors say concerning stones, plants, animals, and the like, but to inspect these stones, plants, and animals with their own eyes is far enough from their thoughts. It is none the less true in the human kingdom of knowledge than in God's kingdom of heaven, that no man shall enter into it except he become as a little child.”

Bacon was right in his time, and what is worse, is too nearly right in our own. That the little children of to-day may not have, when they have grown old, the mortification that we so often feel when obliged to confess our ignorance of the natural world all about us, our school curriculum now includes Nature Study. It is a subject of universal interest to children. The materials needed are at their very doors and the study of these gives them a knowledge of this beautiful world, trains their power of observation, gives them some of the very best materials of thought, and must develop a greater love for the beauties and wonders of nature to the end that their conception of the Creator must increase in like ratio.

If for my children I were obliged to choose between a knowledge of one-half of the arithmetic and one-half of the geography that are now studied in our schools, or an elementary knowledge of the earth's crust beneath their feet, the humble flowers by the wayside, the trees and birds, the life in the waters, and the stars that shine above, I should not hesitate for a moment. I know of no subject of which civilized man is so universally ignorant as this, that all the children of Quincy, from 5 to 15 years of age, are now investigating—as yet somewhat crudely to be sure, but nevertheless to their lasting profit. That the citizens may have some idea of the trend of the work, I submit a very brief synopsis of the topics of the eight grades for the last ten weeks.

	1	2	3	4	5	6	7	8	9	10
I.	Goldenrod	Apple (Fleshy fruit)	Cat	Leaf Twigs (Red)	Peach (Stony fruit)	Nastur- tium	Dog	Dog	Granite	English Sparrow
II.	Apple and Peach (compared)	Evening Primrose	Gentian	Garnet	Grasshopper	Crow or Robin	Dry Fruit	Quartz	Canary Pigeon	
III.	Arrange- ment of Leaves	Form of Leaves	Squirrel	Surface of Leaves	Rabbit	Kind of Roots	Life of and Uses of Roots	Quartz and its Varieties	Quartz	Quartz
IV.	Gravel	Apple	Sand	Melon	Clay	Grape	Soil and Subsoil	Bean Pod	Hill	Dry Fruit
V.	Slate	Slate	Sandstone	Sandstone	Pudding- stone	Pudding- stone	Granite	Granite	Marble	Marble
VI.	Big Dipper	North Star	Little Dipper	New Moon	Half Moon	Third Quarter	Full Moon	Cassio- pea	Cepheus	Review
VII.	What is Food? Is Alcohol a Food?	Time and Manner of Taking Food	Quality and Quantity	Review	Air Why Needed	Pure and Impure	Ventila- tion	Drain- age	Review	Review
VIII.	Frog	Frog	Turtle	Turtle	Fish	Fish	Bird	Bird	Cat	Cat

The human body has not been forgotten. The topics for the first term of the school year (beginning in September) were as follows :

- I. Parts, use, care.
- II. Parts compared with similar parts of other animals.
- III. Touch, sight, effects of alcohol and tobacco.
- IV. Skin, muscle, tendon, effects of alcohol and tobacco.
- V. Organs of digestion and circulation, effects of alcohol and tobacco.
- VI. (Begins second term.) Organs of respiration, effects of alcohol and tobacco.
- VII. Food, air, needs of body. Is alcohol a food ?
- VIII. (Begins second term.) Special senses, effect of alcohol and tobacco.

The disadvantage that we have to cope with is the fact that our teachers have not been trained for this work. Although they strive faithfully and earnestly, and have attended the regular grade meetings and voluntary ones out of school hours in addition, yet they cannot handle this topic as they do the old-time subjects.

The amount of instruction "as to the effects of alcoholic drinks, stimulants and narcotics on the human system," is increasing in a systematic manner, and with the close of another year greater progress should be reported. The warfare against these evils can be waged best among the young. To the children more than to legislation we must look for an advance in the general sentiment of the community regarding temperance. Especially should the use of tea, coffee and cigarettes be censured. Three times during the past year I have caused persons to be warned who were allowing children to purchase cigarettes under suspicious circumstances.

XV. COOKING.

This year has witnessed the introduction of two new subjects : Cooking and sewing. As yet the former has been limited to the High School.

Food, its chemistry, its elements, its digestion and its nutrition; the need of it for animal warmth, for energy and for repairs, and the effect of the different elements in the body are now considered a profitable subject for study. The doctors testify that diet can make men strong, intelligent, chaste, sober, or it can do the opposite. Miss Parloa says: "Dirty homes and improper food fill our prisons and almshouses with drunkards and criminals." Since there cannot be a subject in which more are interested, we should consider how the next generation may escape some of the evils that have befallen our own. If the mothers of that generation can be taught habits of thrift and scientific cooking, a greater ability and a more intelligent administration of the household will follow. Certainly such results must follow increased knowledge; but increased knowledge demands teaching, and so it was thought best by this School Board to make a humble beginning.

The pupils must be taught neatness, method, economy, exactness. They must learn the nature of combustion, the construction and care of a stove, the making and keeping of a fire. They should study the animal food in our markets and the selection of the parts best suited to special uses, the extraction of their nutritious properties and their preparation for the table. It goes without saying that good bread, common vegetables, appetizing soups, in fact, what we call everyday cooking, should be emphasized most of all. Such preparations as demand the least of our digestive organs, but build up the wasting tissues and tempt the uncertain appetites of our invalids, should be included in our course. When the subject is thus developed, it becomes a fitting complement of Physiology and Hygiene.

Only a beginning has been made during the last term. Ten lectures have been given in the large room of the High School to the young ladies of the school. The average attendance has been 80. The subjects taught were of a practical nature as will be seen by consulting this list:

1. Making and care of a fire. Baking potatoes. Croutons.
2. Classification of food. How it builds up the body and keeps it warm. Baked apples. Baked crackers with cheese. Brown Betty pudding.

3. Boiling or cooking in water. Experiments with albumen and starch. Boiled potatoes. Boiled eggs. Beef tea.

4. Steaming and other forms of cooking with boiling water. Oatmeal. Steamed apples. Steamed rice. Boiled custard.

5. First lessons in meat. Boiled mutton. Braised beef. Baked liver.

6. Warming over meats. Scalloped mutton. Beef hash. White sauce.

7. Soups. Making soup stock. Potato soup. Vegetable soup.

8. Broiling. First lesson in dough. Broiled chop. Broiled meat cakes. Plain suet puddings.

9. Stews. Beef stew and dumplings. Baking powder biscuit.

10. Making and baking yeast bread.

These lectures have been given out of the regular school hours, on Friday afternoons at 2 o'clock. Therefore, the large voluntary attendance has shown that the new opportunities have been appreciated. By a series of written questions it was learned when these lessons began that, by their own confession, 49 did not have even a *fair* knowledge of bread-making; 27 of cooking meat; 74 of soups; 51 of fish; 68 of oysters; 25 of common vegetables; 5 of eggs; 28 of cake; 36 of pie; 61 of puddings. At home in case of emergency 14 could not prepare a common meal and 79 had no regular share in the housework.

The vote for the continuance of this course was 104, and as half the whole number attending have been present at all the lessons, although they were optional, the course should be continued and enlarged.

XVI. SEWING

The special gift of the year to the Grammar Schools has been the introduction of sewing. This branch cannot claim as important a place in our domestic economy as cooking, for it does not so directly affect the health and has not had so great an

influence in bringing us to our high estate, but nevertheless it is one of the arts of civilized life and altogether very practical. It is not only an accomplishment, but a necessity, and in time of need it may become a means of subsistence. The teachers know that some mothers will not patch, mend and darn, and as their children cannot, the "stitch in time" or out of time, is lacking.

I had a curiosity to find out what the 550 girls of the V., VI., VII., and VIII. grades thought they knew when the lessons began. It was learned that 50 per cent. *thought* they could darn a stocking; 37 per cent. patch a dress; 37 per cent. make a pillow slip; 35 per cent. make a work apron; 30 per cent. feather stitch; 25 per cent. make button holes; 13 per cent. hem stitch; 4 per cent. make a felled seam; 4 per cent. set in a gusset; 3 per cent. make whipped ruffling; and 20 girls declared that they knew absolutely nothing. Later, the sewing director stated that they had decidedly over estimated their knowledge, and therefore a liberal discount should be made from the data given above.

Many tired mothers have rejoiced to know that their children are being systematically trained and they will expect a greater development of the subject in the coming year. It was thought best to include the boys until they had learned some of the most elementary work. The ability to sew on a button, darn, mend or patch a tear, is not to be despised even in this age of sewing machines.

XVII. DRAWING.

The Drawing Course has become so integral a part of the Quincy system that the simple statement, that it is as satisfactory as in the past, will suffice. Perception, memory, imitation, imagination are being developed. With drawing are now included the more elementary principles of manual training and when this subject comes into our curriculum, as come it must, then our children will be more than ready for it.

XVIII. MUSIC.

Since September, 1891, this subject has received only an hour and a quarter per week. Before this date there was no limit, excepting that the time must not be less than twenty minutes. By the new time schedule, nearly as much ground has been covered. This is due in fact to the increased knowledge of the regular teachers and to their greater ability to instruct. The special director of music visits each room once in two weeks, examines the work, offers her criticisms, and gives what ever advice is needed.

XIX. LING SYSTEM.

No one who has carefully observed our children, as they have passed on their way to school, will doubt for a moment their need of physical development. "Erect attitude and graceful carriage,—straight back and correct apposition of the shoulder blades; capacious, well-formed chest, and great amplitude in the respiratory movements of the ribs; firm and graceful balance and gait;" the observer will not see. Such a development is, however, the ideal of the Ling System.

Two-thirds of our teachers in the fall of '91, realized our need, engaged a graduate of the Boston Normal School of Gymnastics, hired a hall, at the close of the afternoon session, took a course of twenty lessons, and paid their own bills. At the present time 46 are giving regular instruction based on these lessons. It necessarily follows, however, that, be they never so zealous, their work requires skilled supervision, so that their mistakes may be corrected. The twenty-four who did not attend the class, or who have come to Quincy since '91, need instruction.

Seeing that the teachers have done so much for themselves, they deserve the assistance of a Director of Physical Training. A member of the Normal School who is taking a post-graduate course can probably be engaged for two or three afternoons per week at a moderate cost.

XX. TRAINERS.

Quincy has no Training School and consequently the sources of home-made teachers are: first, the Training Class and, second, an apprenticeship served in assisting the regular teachers or substituting for them. By this process of development many excellent teachers have been secured, but mostly in the lower grades, as the major part of the would-be teachers prefer that work.

It should be distinctly understood that the School Board is under no obligation whatsoever to those who train or assist. The obligation is rather on those aided. Both get without price a *practical* knowledge that very few Normal Schools can give. It is needless to say that the Normal is far ahead in theory and in the opportunity offered for a broader education. When the trainer who has worked under the supervision of an experienced teacher and has observed intelligently the methods used, has given proof of knowledge and ability, she is often employed as an assistant in a crowded room. I write thus plainly because there seems to be some misunderstanding in Quincy and elsewhere.

The conditions of entrance to the training class are so often asked that I quote from the printed circular.

Candidates for admission to the Training Class:

1. Must be eighteen years of age.
2. Must have completed a High School course, or its equivalent.
3. Must agree to maintain their connection with the class for one school year, unless released for reasons deemed sufficient by the Superintendent.
4. Must present certificates of character, scholarship and health.

There is no fee for tuition, but the trainer is expected to aid the regular teacher in every possible way in return for the help and advice given.

The class is organized in September of each year, but an applicant may enter during the year, if there is a vacancy.

The class that has been at work the past term consists of twenty-seven young ladies. The small number of trainers from Quincy results from no graduating class from the High School last June.

See appendix.

XXI. RESIGNATIONS IN 1892.

It will be seen from the list in the appendix that Quincy is still a training school for the suburbs of Boston. At least 14 have left for financial reasons. It is unnecessary to say that salaries of \$620 or \$600 are not offered to our poorest teachers. Such losses weaken our corps of instructors, and however valuable the successors may become, for a time there is a heavy loss to the individual rooms. This Board has always been ready to release a teacher when a chance for advancement comes, but expects a two weeks' notice.

XXII. GENERAL MEETINGS.

Beside the special grade meetings all the teachers have been called together for the purpose of increasing their general information, and of arousing their minds that of a necessity tend to move in certain grooves because of their daily work.

With this design in view these eight meetings have been held :

March 4, Henry T. Bailey, Agent State Board Education.

March 21, H. W. Lull.

March 24, H. W. Lull.

May 31, Dr. Joseph M. Sheahan.

June 3, S. E. Brassill.

September 12, H. W. Lull.

November 17, Dr. Joseph M. Sheahan.

December 6, Dr. George B. Rice.

These meetings are a strong reminder of the unfortunate fact that we have no proper place for such an assembly of all

the teachers. No one room that is lighted is large enough for their accommodation. In the new High School building such provision should be made, and then a regular course of lectures on educational and kindred subjects will be possible.

XXIII. COLUMBUS DAY.

In accordance with the proclamation of the President of the United States, the proclamation of our own Governor, the vote of this Board, and the desire of all patriotic citizens, the nine schools observed Friday, October 21st, with elaborate ceremonies. In general the schools followed the national programme, but each had its own characteristic feature.

The following citizens took part in these exercises:—Mayor Fairbanks, Rev. S. Brainard Duffield, Rev. Edward Norton, Rev. H. A. Philbrook, Rev. W. Sherman Thompson, Rev. D. M. Wilson, and Rev. W. M. Fritch; Comrades J. Q. Bent, J. M. Cutting, Franklin Jacobs, James F. Merrill, Jonas Shackley, and H. O. Souther, of the Grand Army; Edwin W. Marsh and Elisha Packard, Chairman Emery L. Crane, Rev. H. Evan Cotton, Dr. John A. Gordon, Elijah G. Hall, and Dr. Joseph M. Sheahan of the School Board, and the Superintendent of Schools.

Large delegations of parents and other friends were present, and followed closely the exceptionally well-prepared and interesting exercises.

XXIV. SCHOOL DECORATIONS.

"It is a glorious thing to give a fortune to a college, but is it not also glorious to sustain generously the public school—especially the grammar grade (the universal school attended alike by the coming statesman and professional, the merchant, and mechanic), where the children are old enough to appreciate and to be influenced by useful and beautiful objects? Should we not be alike interested in this common educator to which we all owe the foundation of our knowledge: are we not all apt to look beyond this common educator when we have a gift to bestow?"

"It is poor economy to put before the accustomed view of children what is poor, mean and paltry. Without their knowing it, what they are wont to see is an essential part of their education.

Whether a certain gentleman of Ward Five has ever read these two quotations, I cannot say ; but he has certainly entered into the spirit of them, and the Wollaston school is a proof thereof.

At the present time, particularly in Boston and Salem, there are many who believe that the child during the formative period of life should have before him in his daily surroundings objects of an artistic nature, so that even while at his studies he may unconsciously absorb what is best and most beautiful in art. If the ugly, the mean, the debasing show their influence on the young mind and soul, why should not the child be just as susceptible to the beautiful ?

No one would claim for a moment that Quincy, *as a city*, should add to its already heavy school tax an extra appropriation for school room decoration ; but if private citizens will contribute to such a cause, they should be publicly commended. At Thanksgiving time the friends of the Wollaston school were invited to inspect one of its rooms and witness the beginning of art decoration in Quincy. That the donor's motives may be known, I quote two paragraphs from the invitation.

First, to inspire the scholars to a greater love of the beautiful, without which life at the best is only a drudgery. We are all more or less molded by our environment. Pictures of the noble men of history and the stately works of art wrought by the world's great masters, stimulate the youth to the highest achievement in patriotic and faithful work. The scholars by becoming accustomed to see what is high and pure in art will unconsciously absorb its influence and learn to appreciate that which elevates and ennobles our lives. The result will be better work at their hands all through life, whether that work be at the bench, in the mart or in the forum."

"The second object is to induce the friends of the children and the children themselves, whether singly or in classes, to continue the work of decoration till all the rooms in the building are rich with the symbols of the glories of the world in art and achievement. One need not furnish a room, but may contribute

a bust, or picture, or vase, or bas-relief, or square of stained glass, until the whole makes of our schoolhouse a museum, and a school of art, patriotism and history."

So well was Mr. W. G. Corthell pleased with the reception of his venture that he took it upon himself to find forty-three others who individually would make at least one contribution from a list that had received the sanction of Ross Turner the artist who has devoted his energies to the movement. The forty-three have been found, and soon the room will be ready for public inspection. The appendix contains the list selected, as it may be of use to those of this city, or elsewhere, who would like to "go and do likewise."

In connection with this subject Mr. S. F. Willard should be given credit for several valuable pictures that he has presented to the Willard School.

XXV. CONCLUSION.

If it is true that "the greatest foe to any advancement is self-satisfaction," there is great hope for our schools. From first primary to the superintendent there is no self-satisfaction, but a constant aspiration for that which is higher and better. We are all trying to secure development and power for all the mental faculties of the children; we are trying to appeal to their intelligence and to their thought; we are trying to care for their physical welfare and for their moral nature. Being no more than human, though teachers, our attempts may fail, but our aims are high.

Finally, permit me to thank the members of this School Board for their constant support during the past year in my new field of labor. To all the teachers, too, my thanks are due for their ready response to all my requests, and for the zeal displayed in their work.

Respectfully submitted,

H. W. LULL,
Superintendent of Schools.

GRADUATES OF THE HIGH SCHOOL.

As a preliminary step towards founding an Alumni Association, it is very desirable to have a correct list of graduates. This list is known to be incomplete, and it is hoped that all those who discover errors will notify the Superintendent of Schools.

All deceased graduates as far as known, have been marked by a *.

ELLEN

CLASS OF '64.

Helen Churchill (Emery)	*P. J. O'Neil
Emma Duggan	*Helen Porter
Emma French	Mary E. Sargent
*Emma Glover	Eliza C. Sheahan
*Sarah Glover	Sarah A. Souther (Mead)
John Munday	Josephine Wright.

CLASS OF '65.

Mary Baxter (Crane)	Ida Edwards.
Elizabeth Cole	Mary E. Hardwick
	*Emma Russell

CLASS OF '66.

Emery E. Fellows	Margaret T. Munday (Gavin)
Abigail I. Hails	Emma Savil
Jerushu Keating (Whitney)	Joseph M. Sheahan
	Mary Sheahan.

CLASS OF '67.

Rebecca P. Basley	Emma J. Keith
Eliza A. Curtis	Mary Marsh
Ellen M. Garrity (Hernan)	William H. Mitchell
Mary J. Garrity (Goodfellow)	Annie L. Thayer
Lucie T. Hardwick	Mary H. Wilson (Howe).

CLASS OF '68.

Emily A. Bosworth (Higgins)	*Katie Lane
Mary E. Eaton (Skinner)	Lizzie E. Morse
Sophia M. French	Mary E. B. Peniman
Catie F. Garrity	Clara F. Sargent (Cook)
*Mary I. Head	Martha D. Whitton (Holmes)

CLASS OF '69.

Angie S. Amsbury (Nash)	Charles L. Hovey
Annie M. Bigelow	Mary J. Newcomb
Minnie J. Carr (Faxon)	*Carrie F. Ricker
Abbie L. Ewell (Wheble)	*Jeannie Sampson
Sarah R. Gregg (Morrison)	Anna L. Savil
Fannie H. Hersey (Sampson)	James E. Starbuck
	Maggie Thompson (Cook)

CLASS OF '70.

*Eliza E. Costello	Amelia G. Mead (Hall)
Susie J. Doble (Fuller)	Abbie F. Taylor (Fenno)
Mary L. Flint	Ella M. Walker (Patterson)
Ida F. Glines (Darby)	Emily Whitney
Annie E. McGrath (Cronin)	Sarah A. Wilde
	Susie U. Wilde (Johnson)

CLASS OF '71.

Mary V. Dorrity (McKabe)	Mary A. Knapples (Murphy)
Henry E. Hardwick	*Mary E. Ryan
Jennie R. Hollister	Abbie O. Spear (Crane)
	Francis A. Spear.

CLASS OF '72.

Mary A. Bosworth (Howard)	*Michael P. Howley
*Mary E. Burns	Carrie B. Johnson
John H. Dinegan	Amos L. Litchfield
Thomas Fenno	Edith Randall
Ellen Fegan	Lucie A. Stoddard
Lizzie B. French (Robinson)	Hattie F. Thayer (Marsh)
Mary F. French (Alden)	Mary E. Willey

CLASS OF '73.

Nellie I. Arey	*Mary E. Gregory
Alice M. Brooks (Piper)	Annie S. Marsh
Hannah E. Desmond	Annie T. McCarty
Franklin Flint	*Mary F. Mulgrim
*John M. Freeman	James H. Penniman
Frederick H. Smith.	

CLASS OF '74.

Frank F. Cook	Ida W. Ellis (Pettee)
Harriet A. Curtis	Simon K. Flint
Ellen G. McDonnell	Catherine E. Gregory
Elizabeth J. Elcock	Margaret E. O'Brien (McNeil)

CLASS OF '75.

Suzene A. Arnold (Clark)	*Mary King (Patch)
Florence Brooks	Lizzie J. McNeil
William T. Carter	Amy F. Newcomb
Mary M. Devlin	Etta F. Nightingale
Mary F. Duggan	A. Maud Randall (Arnold)
*Annie F. Sargent (Clapp)	

CLASS OF '76.

Ralph G. Crane	Daniel H. Keniley
Minnie S. Davis (Ripley)	George W. Starbuck
Mary E. Fitzgerald	Alice G. White.

CLASS OF '77.

Julia F. Cahill (Coyle)	Sibylla A. Pfaffmann
Susan C. Flint	Frank F. Prescott
Mabel G. French (Swift)	Nellie B. Randlett (Badger)
F. Wesley Fuller	Katie A. Raycroft
Fred F. Green	Mary J. Shea (Walsh)
Annie J. Lane	Jennie Smith (Owens)
Herbert W. Spear.	

CLASS OF '78.

Margaret E. Burns	Charles W. Jones
Julia T. Damon (Wentworth)	Charlotte L. Polson (Emerson)
Caroline N. Eaton (Sprague)	Emma C. G. Polson
Lucy W. Faunce (Pinkham)	Elizabeth A. Souther
*Mary E. Faxon	Anna M. Starbuck
Emily M. Garrity	Mary F. Underwood
John J. Garrity	Abbie J. Wisley (Higgins)
Clara A. Grignon	Jonathan O. Williams.

CLASS OF '79.

Minnie J. Carter (Myers)	Manetta W. Tenney
Theresa S. Fegan	Addie C. Starrett
Nellie W. French	*Emily G. Townsend.
Dorcas C. Higgins	Ella A. Whebble.

CLASS OF '80.

Elizabeth M. Brewer	Alice T. Kelley
Annie F. Burns	John T. Larkin
Helen M. Chamberlin	Sarah A. Malone
*William F. Dugan	B. Teresa McDonnell
T. George Emerson	Ida F. Paine (Humphrey)
John G. Faxon	Nettie A. Randlett (Badger)
Lizzie F. Faxon	Henry H. Sheen
Charles H. Fuller	Horace F. Spear
Georgia M. Glines	Mary P. Underwood
Katie T. Wendell.	

CLASS OF '81.

Joanna L. Callahan	Mary W. Holden
Sarah F. Costello	Rose L. Holt (Fuller)
Mary E. Crane (Lovett)	Nellie F. Kendall
Carrie A. Crane	Arthur W. Newcomb
Ellen A. Desmond	Winnie F. Kendall
William I. Dewson	Belle Nightingale
Katie G. Early	Lucy G. O'Connell
Frank H. Floyd	John G. Owens.

CLASS OF '81 (*Continued*).

Annie G. Hayes (Watson)	Winnie F. Kendall
Annie L. Hayward	Belle Nightingale
Cora A. Hayward	Lucy G. O'Connell
Mary W. Holden	John G. Owens
Rose L. Holt (Fuller)	Mary Smith (Goodwin)
Nellie F. Kendall	Lucy M. Spear
Arthur W. Newcomb	Henry A. Talbot.

CLASS OF '82.

Mabel E. Adams	James R. Lovett
Fred L. Badger	Wilson Marsh
Mary Boyd (Fitzgerald)	Lizzie Mason (Kennear)
Annie F. Comey (Conway)	Annie W. Miller
Mary H. Cudworth	Addie W. Miller
William J. Dell	Mary E. Nightingale
Minnie H. Doane (Thomas)	Mary A. Osborne (Keith)
Alice L. Faircloth	Lizzie W. Penney
Dennis J. Ford	Lillie H. Polson
Maggie T. Garrity	William J. Thompson
Nellie C. Gragg	Ellen R. Washburn
Benjamin Johnson	James S. Whiting
James E. Woddick.	

CLASS OF '83.

Alice Adams	Grace E. Ingram (Bennett)
Maggie Brown	Annie B. Kelley
Louisa B. Carter	Mary L. Linton
Mary L. Conway	Edward B. Marsh
Joseph F. Costello	Carrie F. Parker
George A. Devlin	Mary C. Parker
Sarah E. Dunphy	Minnie J. Pratt
Butler T. Emery	Charles A. Price
Emma M. Farnum	Henry W. W. Rideout
Maude D. Field (Dewson)	Addie F. Scott (Glover)

CLASS OF '83 (*Continued*).

Emma C. Flint	Emma J. Shackley (Hoxie)
*Clara P. French (Wooley)	William W. Sheen
*Clara M. Gilrairie	*Edward J. Webb
Walter B. Holden	Arthur C. White
Emily R. White.	

CLASS OF '84.

Evart W. Adams	Elisa S. Dinnie
Grace H. Adams (Spear)	Leonard L. Elden
Arthur Benson	Anna T. Enderle
Williamina Birse	Elizabeth Evans (Spear)
Cortes W. Cavanaugh	Elizabeth A. Garrity
Mary E. Collagan	George I. T. Linton
Margaret F. Connell (Cray)	Annie H. Pitts
Mercine E. Dickey (Flynn)	Morton T. Swallow
Clara A. Veazie (Penley)	

CLASS OF '85.

Howard W. Battison	Gene M. McCormick
Nellie F. Boyd	Sarah McKenna (Donovan)
Ellen C. Coffee	Susie H. McKenna
Philip D. Cook	Nellie F. Nightingale
John J. Cuniff	Carrie C. Norton
Daniel J. Deasy	Adaline G. O'Connor
Mary L. Edgerton (Badger)	Emma L. Osgood (Kent)
Edward M. Fairecloth	Grace D. Parker
Florence R. Faxon	Maud Rice
Virgil W. Fuller	Maud E. Roberts (Moore)
Charles A. Hall	Mabel G. Sampson
Charles W. Hall	Lizzie Smith
Lillian T. Harlow	*Elie Sweeney
Laura S. Hayward	Annie F. Swift
Annie M. Keenan	Lottie E. Swift
Lizzie B. Kittredge	Margaret L. Thomas

CLASS OF '86.

Isabel L. Albee	Caroline Litchfield (Packard)
Maggie M. Badger	Henrietta A. McDonald (Gourd)
— Mabel L. Baxter	Ada M. Nightingale
Jeanette M. Billings	Leila C. Ordway
Rena M. Chamberlin	James A. L. Pierce
Marcia Dickey	Clara B. Pitts (Dunbar)
Susan M. Foley	Minnie M. Rogers
Alice B. Hersey	Mabel A. Shaw (Pfaffman)
Elizabeth E. Jones	Caroline M. Shunk
Iehabod H. Jones	Clara E. Thompson
— Georgianna Lane	Nellie M. Thompson
Caroline Leban	Elsie A. White
	Mary A. Worster

CLASS OF '87.

Annie K. Bailey	Percival A. Hall
Frederick E. Betts	Harry W. Lakin
Mary E. Biganess	Fannie W. Osborn
Ethel A. Burke	Marcella L. Pierce
Annie M. Cahill	William L. Reardon
May S. Cole	Florence G. Roberts
Minnie F. Eaton	Helen J. Sullivan
Margaret E. Haley	Julia A. Williams.

CLASS OF '88.

Lillian L. Barker	George W. Holden
Catharina W. Billings	Frederick E. Jones
Abbie B. Brackett	Lillie F. Marsh
Margarett A. Callahan	Bartlett A. McLane
Hannah F. Cannon	Leila A. Miller
William I. Chubbuck	Janet G. Patterson
Charlotte F. Donovan	Alice C. Ring
*Agnes Dunn	Elizabeth Sullivan
Frank A. Emery	Jesse G. Swift
Grace W. Emery	Mary E. Tanner
George F. Field	Addie L. Tupper
Mabel S. Hodges	Minnie E. Welch

CLASS OF '89.

Mary E. Bates	Mary M. McNally
Honora Z. Burgess (Burns)	Lela O. Moxon
Maria E. Drew	Cora A. Newcomb
Lucy P. Eaton	Mary A. Pfaffmann
Clarence E. Fuller	Harriet B. Pierce
Ernest D. Gourd	Ellen E. Ring
Lillian W. Hammond	Mary M. Souther
Lucy L. Hayes	William R. Thomas
Mary E. Lavers	Margaret M. Thompson
Minnie W. Litchfield	Ellen C. Welsh
David L. Whittemore	

CLASS OF '90.

Dolly A. Baxter	Charles A. Hobart
Grace G. Bigelow	Annie M. McCormick
Lucy W. Brown	Catharine C. McGovern
Ida J. Cameron	Charles W. Miller
Stella M. Crocker	Harry O. Parker
Bartholomew J. Crowley	Carleton C. Perry
Mary A. Deasy	Maude W. Perry
Augusta E. Dell	Charles E. Pierce
Henrietta J. Dell	Maude E. Polsom
Alice Dunn	John J. Reardon
Henrietta E. Esson	William L. Sullivan
Elizabeth T. Gearin	Lucy B. Tarbox
Charles C. Hill	Florentine A. Waters.
Catherine E. Walters.	

CLASS OF '91.

Mary E. Butler	Alice M. M. Richards
Mary A. Cleverly	Elizabeth J. Shepherd
Annie J. Eaton	Frances C. Sullivan
Carrie B. Gannett	Edith B. Waldron
Clara L. Graham	Jessie L. Webb

CLASS OF '91 (*Continued*).

Edith P. Gray	Charles L. Hammond
Annie P. Hall	Walter H. Hersey
Edith W. Jennings	Walter P. Hill
Sadie M. Jones	Arthur W. Priest
Sadie R. Melzard	Walter E. Simmons, Jr.
Margeret G. Mundy	William L. Thomas
Ines L. Nutting	John W. Thompson.

CLASS OF '92.

No graduation in 1892. Course changed from three to four years.

*Deceased.
